Comment: One respondent claimed that section B is inconsistent with OMB Circular A-130 and that the order of sub-paragraphs B(1) and B(2) should be reversed.

Response: Section B relates only to the PTO search facilities and PDLs. This policy is consistent with OMB Circular A-130 by providing an information "safety net" to the public through the dissemination of information in the search facilities and libraries. PTO states in paragraph F that, outside the search facilities and libraries, it will encourage the private sector to offer commercial patent and trademark search and retrieval services, and it will not compete with the private sector.

Sub-paragraphs B(1) and B(2) state that PTO will choose the most efficient means for providing search and retrieval services in its search facilities and PDLs, directly and/or through a contractor.

Comment: One respondent suggested that there might be misunderstanding between sections C and E.

Response: Section C specifically refers to commercial data bases whereas section E refers to PTO-owned data bases.

Comment: In section D, what does the term "existing collections in the PDLs" mean?

Response: In the June 23, 1988 edition of the *Federal Register*, the reference to "existing collections" meant the collections held by each individual library. Collections vary from library to library, and acquistion of collections is up to each individual PDL. Section D has been revised because section 104(c) of Public Law 100-703 allows the Commissioner to establish reasonable fees for on-line access to the automated search systems.

Comment: Section E provides for the possibility that a commercial search and retrieval service could be substituted for the PTO automated systems in the PDLs. Would the PDLs be required to absorb the cost?

Response: Arrangements would be worked out between the PTO and each individual library and would depend on the library's ability to provide commercial services on its premises.

Comment: One respondent asked for a brief explanation of OMB Circular A-76, entitled "Performance of Commercial Activities."

Response: The A-76 process enhances quality and efficiency by using competition to select the most cost-effective operation to perform a service. It requires that studies be conducted to see whether work should be performed by the Government or by industry. This program was formalized in 1955 and, in 1966, the Bureau of the Budget issued the policy as Circular No. A-76.

Comment: One respondent suggested that the word "indirectly" in section F should be removed since there already are many private trademark search enterprises. Another respondent suggested that the word "encouraged" in that same section should be changed to "allowed." A third resondent said that PTO should "directly encourage" the private sector by making its data available in electronic form.

Response: Section F as written expresses how the PTO will indirectly achieve its dissemination goals. No change has been made to the wording.

Comment: One respondent suggested that PTO should not even consider "exclusive" arrangements with regard to the sale of bulk data as suggested by Section H.

Response: Paragraph H has been changed by deleting the word "normally."

Comment: One respondent suggested that marginal cost recovery described in section I should be limited to commercial entities seeking bulk data.

Response: All cost of goods and services are fully user-fee funded under the terms of OMB Circular A-25, "User Fees."

Comment: Several respondents asked for clarification of the statement that the trademark automated system could be ready for public deployment by September 30, 1988.

Response: Under a proposed rule package entitled Patent and Trademark Automated Search System Fees, the PTO is proposing to provide access to T-Search.

Comment: One respondent asked for clarification and more specificity to the response concerning the PTO's authority to automate PDLs.

Response: Section 13 of title 35, United States Code, authorizes the Commissioner to conduct a patent depository library program for disseminating patent information to the public. The Paperwork Reduction Act of 1980, as amended, 44 USC, chapter 35, requires each Federal agency to "implement applicable government-wide...information policies...with respect to...dissemination of information...and other information resource management functions..." OMB Circular A-130 establishes a Government-wide policy of disseminating Government Information products and services in the manner most cost effective for the Government. Accordingly, the Paperwork Reduction Act would authorize disseminating patent information to the PDLs in some electronic form, in lieu of paper or microfilm, if it is the most cost-effective mode. The authority for providing access to patent and trademark information in the PDLs like that for the Patent Search Room and Trademark Search Library is the authority inherent in various provisions of the patent law other than section 13 such as section 10 of title 35. The PDLs serve as extensions of the PTO for disseminating patent and trademark information in other geographic locations.

Comment: One respondent asked that PTO adhere to Rep. Kastenmeier's instructions reported in 134 Cong. Rec. H9676 (daily ed. Oct 5, 1988) (statement of Rep. Kastenmeier), to follow the letter and spirit of the copyright law regarding nonpatent literature.

Response: The PTO will adhere to the letter and the spirit of the copyright law as it applies to the inclusion of nonpatent literature in the Automated Patent System.

Other Considerations:

The PTO has determined that this notice is not a major rule within the meaning of section 1 (b) of Executive Order 12291. Therefore, a Regulatory Analysis has not nor will be prepared. Because a notice of proposed rulemaking and an opportunity for public comment are not required to be given for this amended policy statement by the Administrative Procedure Act (5 U.S.C. 553(b) (A)), no initial or final Regulatory Flexibility Analysis has to be or will be prepared. The PTO also has determined that this notice has no Federalism implications affecting the relationship between the National Government and the States as outlined in Executive Order 12612. This notice does not contain a collection of information requirement for purposes of the Paperwork Reduction Act.

ELECTRONIC DATA DISSEMINATION POLICIES AND GUIDELINES

Dissemination in Govenment Public Search Facilities and Depository Libraries

It is the goal of the PTO to achieve effective, widespread dissemination of information concerning patents and Federally registered trademarks to all segments of the U.S. public.

A. The dissemination goal will be accomplished directly by the PTO by providing electronic search and retrieval services to the public in search facilities located in the PTO, in other facilities which may be established by the Government and in Patent Depository Libraries (PDLs). PDLs are Federal, State and local government, university or non-profit organization libraries designated by the PTO to offer public access to patent collections.

B. To the extent funding is authorized and appropriated, search and retrieval services will be provided in the PTO's search facilities and PDL's either:

(1) by the PTO, using its own data bases, computers, communications equipment, and software, and/or

(2) by PTO contractors.

C. Access to commercial data bases that are available to the PTO's examiners, for example industry-specific data bases, will be furnished either through an APS workstation or a terminal furnished by data base vendors in the PTO public search facilities at commercial rates,

VOL 1122 ISS 1 JA 1 1991 UMI

provided the user has established a commercial account with the data base vendor.

The PTO will not act as an agent for any data base vendor in providing training for, assisting in, or collecting fees for the use of such commercial data bases.

D. Services furnished in the PTO public search facilities and in PDLs will be at no cost to the public for access to paper and microform records. The cost of accessing PTO owned electronic data bases and systems will be recouped from user fees set to recover the marginal costs of such services.

E. The type of service for public search and retrieval, either PTO or commercial services, will be chosen based on the method and criteria established by the 1983 revision to OMB Circular A-76, entitled "Performance of Commercial Activities."

Distribution of PTO Data for Commercial Dissemination

F. In addition to B. and C. above, the PTO will pursue its dissemination goal indirectly by encouraging the private sector to offer commercial patent and trademark search and retrieval services and will seek to avoid competition with private sector firms in providing such services to the public outside the PTO search facilities and PDLs.

G. Fees charged for bulk data developed by the PTO will be based on the marginal cost of providing such distribution services.

H. Arrangements will be non-exclusive. Bulk resale of PTO data will be permitted subject to the terms of each bulk sales agreement.

I. Fees charged to the public for U.S. patent and trademark data products will be based on the marginal cost of providing such products.

J. The PTO will receive non-U.S. electronic patent data through exchange agreements with other patent offices and international intergovernmental organizations. In general, the PTO will not distribute such data, except in conjunction with services that may be provided by the PTO or its contractors in the PTO public search facilities and PDLs. Rather, it will seek to have contractual arrangements established directly between the organization and the commercial data base vendor and will not act as a service agent or representative unless there is a special need that cannot be met otherwise.

TRADEMARK PUBLICATIONS

(240) Separation of the Patent and Trademark Sections of the Official Gazette

Effective February 2, 1971, the *Official Gazette* will be separated into two parts to be known as the *Patent Official Gazette and the Trademark Official Gazette.*

* * * * *

Orders for subscriptions should be addressed to Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Also effective February 2, 1971, the *Official Gazette* will no longer contain "Decisions in Patent and Trademark Cases." Decisions of the type heretofore found in the "Decisions in Patent and Trademark Cases" are published by non-Federal organizations such as, for example, the Bureau of National Affairs, Inc., 1231 25th St. NW., Washington, D.C. 20037, and West Publishing Co., 50 Kellogg Blvd., St. Paul, Minn. 55102.

Finally, the "Decisions Leaflet" of the *Official Gazette* will no longer be supplied as a separate subscription item after January 26, 1971. According to present plans, however, both the *Patent Official Gazette* and the *Trademark Official Gazette* will have identical "Patent Office Notices" sections containing notices of the various types heretofore published in the Gazette decision leaflet and Trademark Section. Those notices of particular interest to Patent Office employees will be accumulated and published approximately every fourth week, and distributed separately to employees.

Dec. 29, 1970. WILLIAM E. SCHUYLER, JR.,
Commissioner of Patents.

(241) Changes in Format for Publishing Trademarks for Opposition

Because of the adoption of the International classification of goods and services by the United States as of September 1, 1973 (see *Official Gazette* of June 26, 1973, 911 O.G. TM 210), it is necessary to change the arrangement in the *Official Gazette* of the marks published for opposition.

Beginning with the issue of May 7, 1974, the section of the *Official Gazette* entitled "Marks Published for Opposition" will be divided into four sections instead of the present two sections. (For the preceding change from one to two sections, see *Official Gazette* of October 13, 1964, 807 O.G. TM 51.) Sections 1 and 2 will be according to international classification and will contain marks in applications filed on or after September 1, 1973, and Sections 3 and 4 will be according to prior United States classification and will contain marks in applications filed on or before August 31, 1973.

In Section 1, all marks presented in combined applications filed on or after September 1, 1973 for registration in more than one international class will be published with only one reproduction of each mark. The reproduction of the mark will be followed by the international class numbers, and under each class will appear the goods or services in connection with which the mark is used. If the date of first use applies to all classes, it will appear following the last class; otherwise, the dates of use will appear after each class.

In Section 2, all marks presented in applications filed on or after September 1, 1973 for registration in a single class will be published in international class order.

In Section 3, all marks presented in combined applications filed on or before August 31, 1973 for registration in more than one prior United States class will be published with only one reproduction of each mark. The reproduction of the mark will be followed by the prior United States class numbers and titles, and under each class will appear the goods or services in connection with which the mark is used. If the date of first use applies to all classes, it will appear following the last class; otherwise, the dates of use will appear after each class.

In section 4, all marks presented in applications filed on or before August 31, 1973 for registration in a single class will be published in the prior United States class order.

The following explanation will appear under the heading "Marks Published for Opposition":

> The following marks are published in compliance with section 12(a) of the Trademark Act of 1946. Applications for the registration of marks in more than one class have been filed as provided in section 30 of said act as amended by Public Law 772, 87th Congress, approved Oct. 9, 1962, 76 Stat. 769. Opposition under Section 13 may be filed within thirty days of the date of this publication. See Rules 2.101 to 2.105.
>
> A separate fee of twenty-five dollars for opposing each mark in each class must accompany the opposition.

Sections 1 through 4 will appear immediately after the above explanation, the sections being designated as follows:

Section 1. International classification—Application in more than one class
Section 2. International classification—Application in one class
Section 3. Prior United States classification—Application in more than one class

Section 4. Prior United States classification—Application in one class

The same procedure of dividing into four sections will be followed in the notice of the issuance of registrations on the Supplemental Register.

Mar. 22, 1974. RENE D. TEGTMEYER,
Assistant Commissioner for Trademarks.

(242) Change in Official Gazette Entry to Show Cancellation of Fewer Than All Classes in a Multiple Class Registration

Effective with the *Official Gazette* issue of December 16, 1980, there will be a change in the *Official Gazette* listing entitled "Trademark Registrations Cancelled." Beginning with that issue, "Trademark Registrations Cancelled" will list:

(1) single class registrations cancelled;
(2) multiple class registrations cancelled in all classes;
(3) multiple class registrations cancelled in fewer than all classes.

For every entry in the listing, the specific classes cancelled will be included in parentheses, next to the registration number and mark.

For a single class registration and for a multiple class registration in which every class has been cancelled, the class number(s) shown in parentheses will represent every class to which the registration applied.

For a multiple class registration in which fewer than all classes have been cancelled, the *Official Gazette* entry will include the word "only" following the notation of classes in parentheses, for example: (Int. Cls. 12 and 20, only). In this example, the addition of the word "only" would indicate that there are classes in the registration in addition to Classes 12 and 20, but only Classes 12 and 20 have been cancelled.

(243) Single Copies of the Trademark Official Gazette

Members of the public ordering single copies of the Trademark Official Gazette from the Superintendent of Documents are reminded they must specify the date of the issue being ordered.

The date of the issue in which a mark will be published for opposition is shown on The Notice of Publication form mailed to applicants approximately two weeks before the publication date. This date must be included on each single copy order.

Orders received without an issue date may be filled from current weekly stock. The Superintendent of Documents cannot check on whether a particular mark is published in the issue then in stock. If the stock is exhausted at the time the order is received, the order will be returned unfilled.

(244) Inadvertently Issued Registration Numbers

Effective Jan. 3, 1984, a new sub-section identified as "Inadvertently Issued Registration Numbers" will exist as the last category of cancellations listed under the "Trademark Registrations Canceled" section of the *Official Gazette.*

This new sub-section will provide public notice of the cancellation of registration numbers which have been inadvertently issued by the Patent and Trademark Office.

(247) **Notice to Subscribers**

The Patent and Trademark Office announces a change in the point of contact for subscribers who have not been receiving all of their copies of the Official Gazette, Manual of Patent Examining Procedures Revisions, Annual Indices, or other patent and trademark publications. All correspondence and inquiries concerning subscription services including requests for reinstatement or renewal of subscriptions should be directed to:

Mr. Michael F. DiMario
Assistant Public Printer
Superintendent ofDocuments (SD)
U.S. Government Printing Office
Washington, D.C. 20401

Furthermore, the Superintendent of Documents advises that expiration notices are sent out approximately three months before the expiration date. However, subscribers should not rely on this schedule. If a notice is not received within two months of the expiration date, the subscriber should renew the subscription with the Superintendent of Documents. Attach a label from the envelope in which the publication is received, together with a check covering the amount of the subscription. if a deposit account with the Superintendent of Documents is to be used, include the deposit account number with the renewal.

This notice is effective with the publication date and supersedes the notice published on this subject in 969 O.G. 2, dated Mar. 14, 1978.

(248) **Notification of Errors in Trademark Official Gazette**

In view of the establishment of in-house photocomposition of the Trademark Official Gazette, it is important that errors noted by the public be directed to a single office within the Trademark Examining Operation for verification and correction.

Written notification of errors in the publication of marks in the Trademark Official Gazette should include the correspondent's telephone number and should be addressed to the Paralegal Specialist, Office of the Deputy Assistant Commissioner for Trademarks, United States Department of Commerce, Patent and Trademark Office, Washington, D.C. 20231. Error notification may also be done by telephone to the Paralegal Specialist in the Office of the Deputy Assistant Commissioner for Trademarks, at 202-557-3268.

Applicants may use this procedure to notify the Office of errors in relation to marks published in the Official Gazette if the error is purely clerical (e.g. typographical error, drawing printed upside down, or incorrectly stated data). This procedure should not be used to dispute information that is actually of record in the application file. The Paralegal Specialist will review the notification of error and verify the existence of the clerical error, determine whether the error can be corrected without jurisdiction being restored to the Examining Attorney or republication being required, and coordinate the appropriate correction procedure.

Notification must be received by the Office within one week after the Official Gazette publication date to permit processing by the Office.

TRADEMARK MISCELLANEOUS

(251) **Recording of Documents Affecting Title**

The Patent Office is liberalizing its policy concerning the recording of documents, other than assignments, which affect title to trademark registrations and applications. Under Rule 2.185 of the Trademark Rules of Practice, instruments affecting title to a trademark registration or application, and licenses of trademarks which are the subject of trademark registrations or applications, will be recorded even though the recording thereof may not serve as constructive notice under Section 10 of the Trademark Act of 1946, as amended (15 U.S.C. 1060).

(252) **International Protection of Government Emblems and Seals**

Change of Intent

The Patent and Trademark Office, Department of Commerce, intends to forward only the 50 State seals plus one department seal for each department listed in the publication "Seals and Other Devices in Use at the Government Printing Office" ("Seals") instead of the entire publication, as indicated on page 59366 of the Federal Register of Dec. 23, 1975.

Since the publication had been printed in 1975, it was assumed that few deletions and additions would be necessary. However, the response to the above notice, along with some necessary deletions, resulted in a large number of seals in the publication requiring deletion. This rendered the publication unacceptable for submission to the World Intellectual Property Organization (WIPO).

Therefore, the Patent and Trademark Office now intends to forward only the 50 State seals along with the departmental seal denoted "No. 1" for each department listed in the "Seals" publication. If this is not the preferred departmental or State seal, the department or State involved is requested to notify the Patent and Trademark Office by Sept. 21, 1976. This notification should either specify the number of the preferred seal, as it appears in the "Seals" publication, or provide a clear, black and white photograph, suitable for reproduction, of the preferred seal. The seal must be no larger than 1 1/2 inches in diameter.

These seals will then be forwarded to WIPO for protection under Article 6*ter* of the Paris Convention for the Protection of Industrial Property.

(253) **Recording of "Territorial Assignments" in the Assignment Division of the Patent and Trademark Office**

It has been the practice of the Assignment Division for many years to refuse to record "territorial assignments," that is, assignments purporting to transfer rights in a trademark registration (not a concurrent use registration) for less than the entire United States. Hereinafter, such documents will be recorded as long as the requirements of the Rules of Practice are met by the documents submitted.

The Office is not addressing the validity or effect of such documents by recording same, but is merely recognizing that such transfers may affect title to a registered mark and therefore ought to be recorded. At the time a Section 8 affidavit or declaration or an application for renewal is filed, the Examiner of Trademarks will consider the effect of such a document.

(254) **Flexible Working Hours**

On Jan. 4, 1979 the Patent and Trademark Office is beginning a 15 month experiment with flexible working hours for its employees. Under the "flexitime" experiment many of the Office's employees will have flexibility to begin their workdays as early as 6:30 a.m. or as late as 9:30 a.m., and end their workdays between 3:00 p.m. and 6:30 p.m. Employees in every case shall of course work eight hours each day. All or most patent and trademark examiners will have flexible hours.

The public hours of the Patent and Trademark Office will continue to be 8:30 a.m. to 5:00 p.m. All units of the Office which deal directly with the public will be staffed to answer telephone calls and receive visitors during those hours. All employees will be on duty from 9:30 a.m. to 3:00 p.m. The patent public search room will continue to operate from 8:00 a.m. until 8:00 p.m. and the trademark search room from 8:00 a.m. until 5:30 p.m.

With the advent of flexible hours, it will be advisable for members of the public to make appointments in advance when they wish to interview examiners.

(255) **THE RETENTION SCHEDULE FOR TRADEMARK RECORDS**

As with most government agencies, the Patent and Trademark Office disposes of old files, papers and records pursuant to a specific schedule. In an effort to clarify any questions concerning the procedures for disposing of Trademark records and in response to public inquiries, the present Retention Schedule for Trademark Records and other records including trademark matters which may be of interest to the public is set forth as follows:

International Intellectual Property Activities Case Files. Project case files showing Patent and Trademark Office activity relating to problems concerning the protection of intellectual property throughout the world. Includes correspondence with private individuals, the Department of State and other countries; reports, records of international meetings concerning patents; trademarks and other matters pertaining to the protection of intellectual property throughout the world; and other materials relating to international affairs.	PERMANENT. Transfer to FRC 5 years after close of case. Offer to National Archives when 25 years old.
Proposed Intellectual Property Legislation Files. Documents accumulated in the preparation and processing of legislation proposed by or in the interests of the Patent and Trademark Office. Includes drafts of legislation, reports to committees on introduced legislation, and comments on legislative proposals.	PERMANENT. Transfer to FRC after 5 years. Offer to National Archives when 25 years old.

VOL 1122 ISS 1 JA 1 1991 UMI

Trademark Adversary Proceedings Files. Consists of Trademark Opposition, Cancellation, Interference, and Concurrent-Use proceedings files.	The past schedule to destroy after 10 years is in the process of being changed. At this time, these records are not being disposed of pending the new amendment to this section.
Canceled Trademark Registration Files. Consists of original application and all related correspondence.	Destroy 2 years after the date of cancellation.
Expired Trademark Registration Files. Consists of original application and all related correspondence.	Destroy 2 years after expiration of registration.
Abandoned Trademark Application Files. Consists of original application and all related correspondence.	Destroy 2 years after date of abandonment.
Trademark Renewal Index. Index to trademark registration that are renewed.	PERMANENT. Offer to National Archives when no longer needed for reference.
Indexes to Trademark Applications. Index shows applicant's name, serial number of application, filing date, name of mark description of goods, attorney's name, and final disposition of the application.	
A. Applicant's Index.	PERMANENT. Offer to National Archives when no longer needed for reference.
B. Serial Index.	PERMANENT. Offer to National Archives when no longer needed for reference.
Proceedings Index to Trademark Adversary Proceedings. Index arranged by type of proceeding. Shows status of proceeding prior to and immediately after a decision by the Board.	Destroy 3 years after termination of the proceeding.
Trademark Adversary Proceeding Records. Card file showing records of Trademark Adversary Proceedings.	PERMANENT. Offer to National Archives when no longer needed for reference.
Trademarks Published in Official Gazette. Clippings of marks from *Official Gazette*.	*Retain in agency until no longer needed for reference.*
a. Those which have been opposed.	*Destroy when mark is registered.*
b. All others.	PERMANENT. Offer to National Archives when no longer needed for reference.
Trademark Registrant's Index. Index to Trademark registrant's name, includes serial and registration numbers, date of registration, line of goods and other related information.	Destroy after information transferred to magnetic media.
Class of Goods Index. Card index used to indicate into what class any conceivable goods may fall.	PERMANENT. Offer to National Archives when no longer needed for reference.
Index to Trademark Trial and Appeal Board Cases. Record of trademark trial and appeal board cases.	
Public Advisory Committee for Trademark Affairs Files.	
a. Agenda, minutes, correspondence, reports and related supporting files.	PERMANENT. Transfer to Federal Records when 10 years old. Offer to National Archives when 25 years old.
b. Paper and reference materials.	Destroy when 10 years old or no longer needed for reference, whichever is sooner.
Seminar in Trademark Practice and Procedure Files. Record set of training materials used in training trademark examiners.	PERMANENT. Transfer to Federal Records Center when 10 years old. Offer to National Archives when 25 years old.
Trademark Petitions Files. Petitions to the Commissioner relating to trademarks with related materials.	
a. Original Petitions in trademark case file.	Dispose of with related case file.
b. Other copies.	Destroy when 2 years old.

Trademark Protest Letters. Letters of protest to the Commissioner related to trademarks.	Destroy when no longer needed or when three years old, whichever is earlier.
International Patent and Trademark Activities Case Files. Project case files showing Patent and Trademark Office activity relating to international patent and trademark programs.	
a. Records that supplement the International Property Activities Case Files (Item 103).	PERMANENT. Transfer to office responsible for international affairs after case is closed.

(256) **Proposed Records Control Schedule**

As with most government agencies, the Patent and Trademark Office periodically updates the schedule it uses to dispose of old files, papers and records. Set forth below is a recent update of the Patent and Trademark Office's Records Control Schedule. The schedule is currently being reviewed by the National Archives and Records Administration and, following its approval, will constitute the basis for disposing of Patent and Trademark Office records.

Any comments or questions related to the proposed schedule should be directed to John Hassett, (703) 557-0183. Written comments should be mailed to:

John Hassett, Director
Patent and Trademark Office

(257) **Public Advisory Committee for Trademark Affairs**

Reestablishment

In accordance with the provisions of the Federal Advisory Committee Act 5 U.S.C. App. (1976) and Office of Management and Budget Circular A-63 of Mar. 1974, and after consultation with GSA, it has been determined that the reestablishment of the Public Advisory Committee for Trademark Affairs is in the public interest in connection with the performance of duties imposed on the Department by law.

The Committee was first established in Sept., 1970, and its present charter expired on Jan. 10, 1979. Since its inception the purpose of the Committee has been to advise the Patent and Trademark Office concerning steps which can be taken to increase the efficiency and effectiveness of administration of the Trademark Act and to provide a continuing flow of knowledge from the private sector to the government in the field of trademarks. Approximately seventy-five per cent of the over one hundred twenty-five specific recommendations have been implemented at least in part. There is no question that the Committee has contributed greatly to the efficiency and effectiveness of the administration of the statute. In reviewing the Committee, the Secretary has sought continued effort towards this objective. The Committee's function cannot be accomplished by any organizational element or other committee of the Department.

As it was initially established, the Committee will continue to comprise the members of the Advisory Committee for Trademark Affairs of the United States Trademark Association. The membership is balanced and is under the control of the President of the Association. The Committee will continue to operate in compliance with the provisions of the Federal Advisory Committee Act.

Copies of the Committee's revised charter will be filed with appropriate committees of Congress.

Any inquiries or comments may be addressed to Patricia M. Davis, Committee Control Officer, Office of Trademark Program Control, U.S. Patent & Trademark Office; Washington, D.C. 20231; telephone (703) 557-3881.

(258) **Advisory Committee for Patents and Trademarks; Establishment**

In accordance with the provisions of the Federal Advisory Committee Act (5 U.S.C. App. 2.) and General Services Administration Interim Rule on Federal Advisory Committee Management, 41 CFR Part 101-6, as amended, and after consultation with GSA, the Secretary of Commerce has determined that the establishment of the Advisory Committee for Patents and Trademarks is in the public interest in connection with the performance of duties imposed on the Department by law.

1. The Committee will advise the Patent and Trademark Office on broad policy issues involving both patents and trademarks, and the overall operation of the Office including matters concerning office-wide Automation programs.

2. The Committee will consist of at least 10 but no more than 18 members to be appointed by the Assistant Secretary and Commissioner of Patents and Trademarks to assure a balanced representation among patent and trademark attorneys, corporate executives, technical research directors, inventors, the judiciary, professional patent and trademark searchers, information specialists and publishers, automation experts, consumer groups, entrepreneurs, and educators. The Committee will function solely as an advisory body and in compliance with the provisions of the Federal Advisory Committee Act. Its charter will be filed under the Act, 15 days from the date of the publication of this notice.

Interested persons are invited to submit comments regarding the establishment of the Advisory Committee for Patents and Trademarks. Such comments, as well as any inquiries, may be addressed to the Executive Assistant to the Assistant Secretary and Commissioner of Patents and Trademarks, U.S. Department of Commerce, Washington, D.C. 20231, phone: 703- 557-3071, or the Department's Committee Management Analyst, phone: 202-377-4217.

Nov. 14, 1986. DONALD J. QUIGG, *Assistant Secretary and Commissioner of Patents and Trademarks.*

(261) **TABLE OF OFFICIAL GAZETTE VOLUME NUMBERS: 1872–1990**

A table which relates volume numbers of the Official Gazette comprising collections of weekly issues of that publication to the month of their publication has found good use in the Patent and Trademark Office and Patent Depository Libraries in a variety of applications. The need for such a table arises, in part, from the fact that Official Gazette volumes have not been uniformly numbered on a monthly basis over the 110 year history of that publication. From Jan. 1872 through June 1883, they were numbered on a semi-annual basis; from July 1883 through Dec. 1902, quarterly; from Jan. 1902 through Dec. 1908, bi-monthly; and since Jan. 1909, the volume of issues for each month has been separately numbered. To fulfill the interest which has been expressed in this table, it is published below:

(261) **Change in Legal Holidays**

The Commissioner's Notice of Sept. 25, 1979, "Change in Legal Holidays," is hereby rescinded in view of Public Law 98-144, enacted Nov. 2, 1983, which amended the listing of legal public holidays in 5 USC § 6103. That amendment took effect in 1986 and added a new legal holiday relating to the birthday of Martin Luther King, Jr. This new holiday is designated for the third Mon. in Jan.

Section 6103, as amended, reads as follows:

New Year's Day, Jan. 1
Birthday of Martin Luther King, Jr., the third Mon. in Jan.
Washington's Birthday, the third Mon. in Feb.
Memorial Day, the last Mon. in May
Independence Day, July 4
Labor Day, the first Mon. in Sept.
Columbus Day, the second Mon. in Oct.
Veterans Day, Nov. 11
Thanksgiving Day, the fourth Thurs. in Nov.
Christmas Day, Dec. 25.

Each of the holidays enumerated will constitute a "Federal holiday within the District of Columbia," as referred to in Section 21, Title 35, United States Code. In accordance with 37 CFR 1.6(a) and 1.10(a), the Patent and Trademark Office will not receive papers on these holidays. Actions required to be taken on such days may be taken on the next succeeding day that the Office is open for business in accordance with 37 CFR 1.7.

July 15, 1986. DONALD J. QUIGG, *Assistant Secretary and Commissioner of Patents and Trademarks.*

(263) **Extension of Time For Filing Notices of Opposition to Marks Published in the Official Gazette Dated January 16, 1990**

Copies of the Trademark Official Gazette dated January 16, 1990 were not mailed until January 22, 1990. Therefore, for marks published in the Trademark Official Gazette dated January 16, 1990, Notices of Opposition filed by February 21, 1990 will be considered timely.

January 30, 1990 JEFFREY M. SAMUELS, *Assistant Commissioner for Trademarks*

[1111 TMOG 49]

(264) **Filing of Papers During Unscheduled Closings of the Patent and Trademark Office**

When the Patent and Trademark Office is officially closed by Executive Order of the President or by the Office of Personnel Management for an entire day because of some unscheduled event, such as adverse weather conditions, the Patent and Trademark Office will consider that day as a "federal holiday within the District of Columbia" under 35 U.S.C. § 21. Any action or fee due that day will be considered as timely for the purposes of, e.g., 35 U.S.C. §§ 119, 133 and 151, if the action is taken, or fee paid, on the next succeeding business day on which the Patent and Trademark Office is open. When the Patent and Trademark Office is open for business during any part of a business day between 8:30 a.m. and 5:00 p.m., papers are due on that day even though the Office may be officially closed for some period of time during the business day because of an unscheduled event. The procedures of 37 CFR 1.8 or 1.10 may be used, as appropriate, for the filing of papers. On any day the Office is open for at least part of the day, papers may also be deposited up to midnight in any boxes which are provided by the Patent and Trademark Office under 37 CFR 1.6(c).

Feb. 11, 1987. DONALD W. PETERSON, *Acting Assistant Secretary and Commissioner of Patents and Trademarks.*

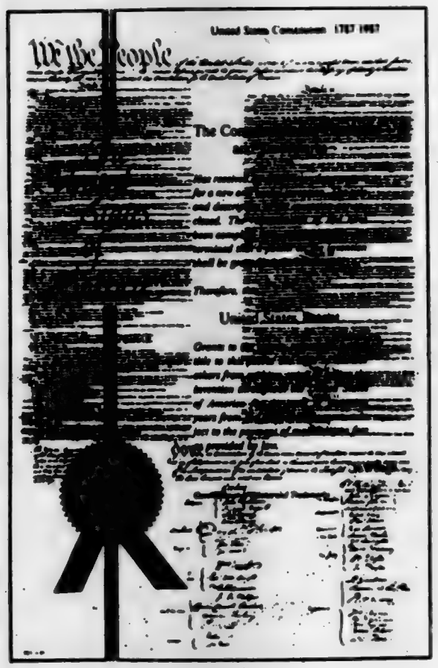
(265) SPECIAL GRANT COVERS COMMEMORATING THE BICENTENNIAL OF THE UNITED STATES CONSTITUTION

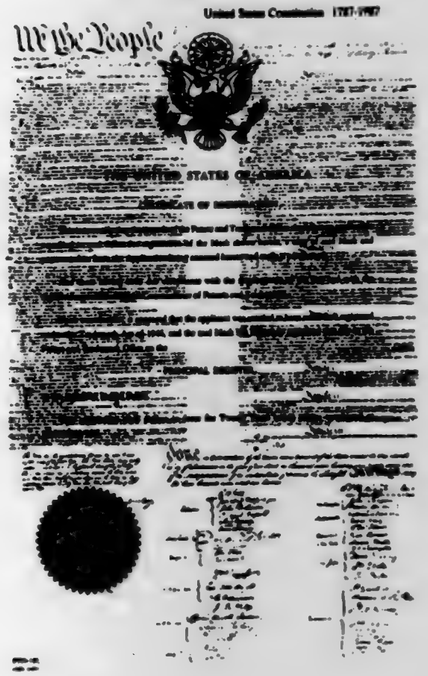
The Patent and Trademark Office will use special grant covers depicting a United States Constitution motif on patents issued and trademarks registered beginning June 2, 1987, and continuing through the last seven months of 1987.

The patent covers will be printed in black and blue on off-white paper with a shadow print of the U.S. Constitution document, sealed with a red ribbon and gold seal.



The trademark certificate of registration on the Principal Register covers will be printed in black on off-white paper with a gold eagle and gold seal, and with a shadow print of the U.S. Constitution document. The trademark certificate of registration on the Supplemental Register will be printed in black on yellow paper with a red eagle and red seal, and with a shadow print of the U.S. Constitution document. The trademark certificate of renewal will not be changed.

Reduced size samples of these special covers are illustrated below.



May 13, 1987.

(266) Regulations Relating to the Use of Patent and Trademark Office Records or Search Facilities and Enforcement Procedures

Agency: Patent and Trademark Office, Department of Commerce
Action: Notice
Summary: The Patent and Trademark Office is revising its regulations relating to use of Patent and Trademark Office records or search facilities and procedures for enforcing these regulations. These regulations and their enforcement are necessary to promote an atmosphere conducive to research and to maintain the integrity of the files and records in the Patent and Trademark Office.
Effective Date: July 1, 1987
For Further Information Contact: Theresa A. Brelsford, Assistant Commissioner for Administration, Patent and Trademark Office, Washington, D.C. 20231, (703) 557-2290.
Supplementary Information: The procedures will apply to all visitors to the Patent and Trademark Office.

Visitors are reminded that unauthorized removal of government material or property may be prosecuted as a criminal felony under the provisions of 18 U.S.C. 2071, in addition to the imposition of administrative sanctions contained in these procedures.

Regulations Relating to the Use of Patent and Trademark Office Records or Search Facilities

These regulations are established for all persons using the facilities of the Patent and Trademark Office (PTO), and will be appropriately enforced as specified herein.

Smoking within PTO is prohibited except in designated areas (41 CFR 101-20.109-10).

All persons using the facilities of the PTO are subject to regulations governing conduct on property under the charge of the General Services Administration which appear in 41 CFR Subpart 101-20.3 (41 CFR §§ 101-20.300 through 101-20.315).

Packages, briefcases and other personal effects brought into the PTO, as well as storage lockers provided for general use, are subject to search by authorized personnel for reasonable cause under the provisions of 41 CFR 101-20.301.

Unauthorized removal of PTO files, documents, reference materials, or any government property is prohibited. In addition to the administrative sanctions specified in these regulations, violators may also be subject to arrest and prosecution under the provisions of 18 U.S.C. 2071 which carries a possible "fine of $2,000 or imprisonment for not more than three years, or both", and/or the violator may be subject to discipline under the PTO Code of Professional Responsibility if he or she is a practitioner as defined in 37 CFR 10.1(r).

All persons must comply with posted Official Notices and with verbal requests made by PTO personnel for compliance with these regulations.

1. User Passes
a. Individuals visiting any area of the PTO must obtain a valid, non-transferable user pass and wear it visibly displayed at all times while on the premises.
b. Permanent User Passes may be obtained from the Manager of the Patent Public Search Room. The first Permanent User Pass is issued at no charge. Permanent User Passes subsequently issued as replacements will be provided at a charge of $5.00 per Pass. The holder of a Permanent User Pass may be issued one (1) Temporary User Pass, within a ninety (90) day period at no charge. A request for a second Temporary User Pass during the same ninety day period will require the purchase of a Permanent User Pass at the required replacement fee.
c. Temporary User Passes may be obtained by visitors at no charge from the managers of the Patent or Trademark Public Search Rooms and are valid through the expiration date stamped thereon.
d. Permanent and Temporary User Passes must be surrendered to the PTO upon request for cause.

2. Use of Search Areas
a. The Patent and Trademark Office facilities may be used by visitors only during the hours specified, Monday through Friday, and are closed to the public on Saturdays, Sundays and Legal Holidays:

Patent Public Search Rm., Mezzanine and Microfilm Center	8:00 a.m.—8:00 p.m.*
Trademark Public Search Rm	8:00 a.m.—5:30 p.m.*
Assignment Search Rm., Public Service Center, and Scientific Library	8:30 a.m.—5:00 p.m.*
Patent Examining Organizations, Trademark Examining Law Offices and all other public access areas of the PTO	8:30 a.m.—5:00 p.m.*

* Clearing of these areas would begin prior to this time to ensure all visitors are out of the building by the time designated.

b. Materials available for search purposes in the Patent and Assignment Search Rooms and patent application file histories shall not be removed from those areas.
c. Trademark registrations in the Trademark Search Library shall not be removed from the secured bundles in the registered file. Photocopying from bound volumes of trademarks is prohibited.
d. Trademark files shall not be removed from PTO space in Crystal Plz. Bldg. 2.
e. Use of Patent Examining Group search areas is strictly limited to searching materials unavailable in the Patent Public Search Room or the Scientific Library. Examining Group search areas may be used only when such use does not conflict with the regular business of the organization.
f. Visitors to a Patent Examining Group Search Area must register with the designated Group Search Area representative indicating the times entering and leaving the area, User Pass number, and the class(es) and subclass(es) to be searched.
g. Documents removed from the files of Patent Examining Group search areas must be immediately returned to their proper location after use. Documents shall not be removed from the area in which they were obtained without specific written authorization from a Group Director or Supervisory Patent Examiner in the Examining Group where the material(s) reside. Such authorization will not be given for U.S. Patents and other material readily available through the Scientific Library.

3. PROHIBITIONS
The following are prohibited:
a. Conduct which is rude or abusive to PTO employees or others.
b. Smoking and consumption of food or beverages in other than designated areas.
c. Loud talking or any conduct which may be disruptive to others.
d. Use of radios, televisions, typewriters, photographic equipment, dictation equipment and other mechanical, electrical or electronic items without specific authorization from an Assistant Commissioner of the PTO.
e. Improper use, mutilation, destruction or unauthorized removal of PTO records, documents or government property.
f. Reserving seats or work areas.
g. Affixing messages to walls, telephone booths or other government property, except designated message boards.
h. Use of the PTO as a mailing address, use of PTO stationery, and use of PTO emblem or seal.
i. Use of PTO telephones and other office equipment, such as copiers, etc., except where specifically provided for public use. This includes the use of PTO telephones to receive incoming calls.
j. Use of any computer terminal other than the TRAM terminals provided for public use in the Trademark Search Library, and the CASPIR and FOUR-PHASE terminals (or CASSIS terminal if the FOUR-PHASE terminals are not operating) provided in the Patent Public Search Room for public use.
k. Placing PTO files or documents, government property or government owned reference materials in rental storage lockers.
l. Use of rental storage lockers without depositing the required fee or holding the key to a storage locker beyond the specified maximum period of use.

[1079 TMOG 7]

(267) Procedures for Enforcement of the Regulations Relating to the Use of Patent and Trademark Office Records or Search Facilities

Under applicable statutes and regulations, including 40 U.S.C. 486(c), 41 CFR 101-20.3, and appropriate sections of Department Organization Orders 10-14 and 30-3 of the Department of Commerce, the procedures appearing below are established.

1. Violations involving unauthorized removal of PTO files, documents, records or government property.
a. Each observed or reported violation will be investigated.
b. Persons found in possession of PTO material or government property, other than in areas or under circumstances where possession is specifically authorized, shall be required to immediately surrender the material or property and if appropriate, their User Pass. An oral explanation for the possession of such material or property will be requested by the PTO.
c. Each incident involving unauthorized possession of PTO material or government property shall be immediately reported by telephone or in person to the Office or Group Director of the area from which the material or property was taken.
d. If it appears to the Office or Group Director that possession of the materials was inadvertent or otherwise unintentional, no further action will be taken. The materials will be replaced appropriately and the person's User Pass will be returned.
e. If it appears to the Office or Group Director that possession of the materials was intentional, all persons involved shall be required to submit written statements detailing the circumstances and, in the case of a PTO User/visitor, show cause why the User Pass and visitor privileges should not be suspended or revoked. Statements will also be obtained from other witnesses where appropriate. The material or property shall be secured for possible use as evidence by the Office or Group Director, if appropriate.
f. If the involved person possesses a Permanent User Pass, it shall be retained and forwarded with the written statements to the Assistant Commissioner for Administration. A Temporary User Pass may be issued as replacement by the Assistant Commissioner for Administration, pending action on an alleged violation.
g. If the involved person possesses only a Temporary User Pass it shall be retained and forwarded with the written statements to the Assistant Commissioner for Administration within two weeks of the incident. No replacement will be provided pending action by the Assistant Commissioner for Administration.

2. Other violations of public use regulations.
a. Each observed or reported violation will be investigated. The persons involved shall be informed of the nature of the violation and requested to comply with regulations.
b. If it appears that the violation was inadvertent or otherwise unintentional and the involved person immediately conforms to the regulations, no further action will be taken.
c. If the violation appears to be intentional or if the person involved refuses to comply with a verbal request from a PTO employee or continues to violate the regulations after being requested to comply, the person shall be required to surrender his or her User Pass to the PTO. A written report of each violation and the User Pass will be submitted to the Assistant Commissioner for Administration for a final decision. User Pass replacement procedures shall be as specified in paragraphs 1.f. or 1.g.
d. If the Assistant Commissioner for Administration determines that a reported violation was inadvertent or otherwise not intentional, the User Pass will be returned and no further action will be taken. In all other cases, the Assistant Commissioner for Administration will request the person involved to show cause in writing why his or her User Pass and visitor privileges should not be suspended or revoked.
e. A written decision will be rendered by the Assistant Commissioner for Administration after consideration of any timely submitted response.
f. In the case of a written decision by the Assistant Commissioner for Administration adverse to a practitioner as defined by 37 CFR 10.1(r), a copy of the written decision will be forwarded to the Director of the Office of Enrollment and Discipline for whatever further action, including sanctions, as may be appropriate under the PTO Code of Professional Responsibility.

3. Factors to be Considered in Assessing Penalties.
a. Penalties will be determined on a case by case basis.
b. Prior violations of regulations will be considered when assessing whether any violation is willful, deliberate or intentional, and when determining the penalty to be imposed.
c. Penalties may be assessed as follows, depending on circumstances:
(1) For a first offense: from a written warning to a 30 day suspension of the User Pass and visitor privileges.
(2) For a second offense: a suspension of the User Pass and visitor privileges from 5 days to one year.
(3) For a third or subsequent offense: from a suspension of 30 days to permanent revocation of the User Pass and visitor privileges.
(4) For any single serious or aggravated violation: suspension of the User Pass and visitor privileges for up to one year or permanent revocation of the User Pass and visitor privileges. A serious or aggravated violation is defined as *any instance involving multiple violations of regulations during a single event or acts which also constitute a violation of Federal or local criminal law.*

4. Record of Penalties Imposed.
If a record of penalties imposed for given violations will be maintained by the Assistant Commissioner for Administration. These records will be made available to the public upon request.

5. Use of Public Facilities During Suspension or After Revocation of User Pass.
No individual will be permitted to use the facilities specified in these regulations while his or her User Pass is suspended or revoked.

6. Absence of Assistant Commissioner for Administration.
In the absence of the Assistant Commissioner for Administration, the Deputy Assistant Commissioner for Administration will carry out the responsibilities assigned by these regulations.

7. Absence of Designated PTO Officials.
In the absence of any Designated PTO Official, a Deputy or Acting Official will carry out the responsibilities assigned by these regulations.

8. Assistance.
PTO employees may, when necessary, request the Security Officer of the Patent and Trademark Office or the Federal Protective Service or their contractors to provide assistance in

carrying out their assigned responsibilities in paragraphs 1. and 2.

May 11, 1987.

THERESA A. BRELSFORD,
Assistant Commissioner
for Administration.

9. Appeals.
Decisions rendered by the Assistant Commissioner for Administration may be reviewed on petition to the Commissioner.

Notice of Maintenance Fees Payable

Title 37, Code of Federal Regulations, Section 1.362(d), effective Nov. 1, 1984, provides that maintenance fees may be paid without surcharge for a six-month period beginning 3, 7, and 11 years after the date of issue of patents based on application filed on or after Dec. 12, 1980. An additional six-month grace period is provided by 35 U.S.C. 41(b) and 37 CFR 1.362(e) for payment of the maintenance fee with the surcharge set forth in 37 CFR 1.20(k) or (l), as amended effective Apr. 17, 1989. If the maintenance fee is not paid in a patent requiring such payment the patent will expire on the 4th, 8th or 12th anniversary of the patent.

Attention is drawn to the patents which were issued on December 29, 1987 for which maintenance fees due at 3 years and six months may now be paid. The patents have patent numbers within the following ranges:

Utility Patents 4,715,066 through 4,716,593
Reissue Patents based on the above identified patents.

Attention is drawn to the patents which were issued on December 27, 1983 for which maintenance fees due at 7 years and six months may now be paid. The patents have patent numbers within the following ranges:

Utility Patents 4,422,183 through 4,423,522
Reissue Patents based on the above identifie,d patents.

No maintenance fees are required for design or plant patents.

Payments of maintenance fees in patents should be directed to "Commissioner of Patents and Trademarks, Box M. Fee, Washington, D.C. 20231."

The current amounts of the maintenance fees due at 3 years and six months and seven years and six months are set forth in 37 CFR 1.20(e) and (f), as amended Nov. 5, 1990, which are reproduced below:

37 CFR § 1.20 Post-issuance fees and surcharges

"(e) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after after Dec. 12, 1980 and before Aug. 27, 1982, in force beyond 4 years; the fee is due by three years and six months after the original grant.....$245.00

"(f) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after Dec. 12, 1980 and before Aug. 27, 1982, in force beyond 8 years; the fee is due by seven years and six months after the original grant.....$495.00"

"(h) For maintaining an original or reissue patent except a design or plant patent, based on an application filed on or after Aug. 27,1982, in force beyond 4 years; the fee is due by three years and six months after the original grant:

By a small entity (§1.9(f)).....$415.00
By other than a small entity.....$830.00"

"(i) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after Aug. 27, 1982, in force beyond 8 years; the fee is due by seven years and six months after the original grant:

By a small entity (§1.9(f)).....$835.00
By other than a small enttity.....$1670.00"

The amounts of the surcharges for paying the maintenance fee during the grace period or after the expiration of the patent are set forth in 37 CFR 1.20 (k), (l) and (m), as amended effective Apr. 17, 1989, which are reproduced below:

"(k) Surcharge for paying a maintenance fee during the 6-month grace period following the expiration of three years and six months , seven years and six months, and eleven years and six months after the date of the original grant of a patent based on an application filed on or after Dec. 12, 1980 and before Aug. 27,1982.....$120.00"

"(l) Surcharge for paying a maintenance fee during the 6-month grace period following the expiration of three years and six months, seven years and six months, and eleven years and six months after the date of the original grant of a patent based on an application filed on or after Aug. 27, 1982:

By a small entity(§1.9(f)).....$60.00
By other than a small entity.....$120.00"

"(m) Surcharge for accepting a maintenance fee after expiration of a patent for non-timely payment of a maintenance fee where the delay is shown to the satisfaction of the Commissioner to have been unavoidable.....$550.00"

Notice of Expiration of Patents Due to Failure to Pay Maintenance Fees

35 U.S.C. 41 and 37 CFR 1.362(g) provide that if the required maintenance fee and any applicable surcharge are not paid in a patent requiring such payment, the patent will expire at the end of the 4th, 8th, or 12th anniversary of the grant of the patent depending on the first maintenance fee which was not paid.

According to the records of the Office, the patents listed below have expired due to failure to pay the required maintenance fee and any applicable surcharge.

TRADEMARK STATUS INFORMATION AVAILABLE ON THE TRADEMARK STATUS LINE

The Trademark Status Line (703) 557-8747 provides status and status date information for all Trademark applications and registrations to users with touch tone telephones. The Trademark Status Line is available from 6:30 A.M. to midnight (Eastern Standard Time), Monday through Friday.

The following is a listing of the status text provided by the Trademark Status Line for each corresponding status code in the TRAM system and the usual location of the file when it is in each status. All information in parenthesis is explanatory and is not part of the status text. All status codes followed by a "*" are within the blackout period for filing Amendments to Allege Use in Intent to Use applications. All status codes followed by a "^" apply to Intent to Use applications only.

1. APPEALS

a. *Appeal Brief Rule*

Briefs filed in cases where the notice of appeal to the Board of Patent Appeals and Interferences was filed on or after September 12, 1988, must comply with amended 37 CFR 1.192(c). 37 CFR 1.192(c) now requires that the brief contain at least the following headings, in the order indicated, and narratives as explained therein and elaborated upon in MPEP Section 1206:

(1) Status of Claims
(2) Status of Amendments
(3) Summary of Invention
(4) Issues

VOL
1122
ISS
1
JA
1
1991
UMI

(5) Grouping of Claims
(6) Argument - Each issue presented for review should be treated under the following headings, as appropriate:
(i) 35 U.S.C. Section 112, first paragraph
(ii) 35 U.S.C. Section 112, second paragraph
(iii) 35 U.S.C. Section 102
(iv) 35 U.S.C. Section 103
(v) Other Rejections
(7) Appendix - A clean copy of the claims, preferably double spaced, involved in the appeal.

37 CFR 1.192(d) provides that if a brief is filed which does not comply with the requirements of paragraph (c), the appellant will be notified of the reasons for noncompliance and given a one-month time limit within which to file an amended brief.

If the applicant does not file an amended brief within the one-month period, or files an amended brief which does not overcome all the reasons for noncompliance stated in the notification, the appeal will be dismissed.

b. *Appeal Fees In Patent Cases*

Appeal fees deficiencies are frequent, causing necessity for extension fees to cover the additional time consumed in making up the appeal fee deficiency. Ensuring proper payment at time of filing the appeal will save money and time.

c. *Notices of Appeal to the United States Court of Appeals for the Federal Circuit*

Notices of appeal to the United States Court of Appeals for the Federal Circuit should be sent to the Solicitor at the address below:

Solicitor
Box 8
U.. Patent and Trademark Office
Washington, DC 20231

Improperly addressing such communications, e.g. to the examining groups, may delay delivery to the Solicitor.

2. APPLICATION FILES

a. *Requests for Allowed Patent Application Files*

Applicants or attorneys requesting files from the Publishing Division, Office of Publications, should make their request at least twenty-four hours in advance to ensure file availability. Attention is especially directed to out-of-town requesters who visit the Office, anticipating same day service. Although the Office is usually able to respond promptly, unexpected inconvenience can be avoided if arrangements are made in advance.

Inquiries and requests should be directed to the Correspondence Section at (703) 557-6397 or (703) 557-6398 between the hours of 8:30 a.m. through 5:00 p.. on weekdays.

b. *Returning Files to the File Information Unit (FIU)*

Customers are reminded that file histories obtained through the FIU are official government records which must not be removed from the confines of the Patent Search Room at any time. Such files must be returned to the File Information Unit by 7:45 p.m. on the same day they are obtained.

FIU personnel will continue to periodically monitor compliance. Should individual patterns of abuse be discerned, administrative sanctions.up to termination of access privileges may be applied.

3.APPLICATION PAPERS FOLLOWING FILING OF NEW APPLICATIONS

a. *Disclosure Statements*

If a disclosure statement is to be filed before an Office action, file it when the application is filed. Some Group Art Units have greatly reduced the pendency to first action. Hence, many examiners are taking up new applications before a disclosure statement is matched with the application.

b. *Drawings - Proper Identification of Formal or Substitute Drawings*

When the Office receives formal or substitute drawings for patent applications, a cover letter identifying the application by serial number should accompany them. It is extremely difficult to associate the drawings with the files when this information is missing. The application serial number should be placed on the sheet of drawing in accordance with 37 CFR I.84(l).

According to 37 CFR 1.84(1), identifying indicia (such as the attorney's docket number, inventor's name, number of sheets, etc.) not to exceed 2 3/4 inches may be placed in a centered location between the side edges within three-fourths inch of the top edge. Either this marking technique on the front of the drawing or the placement of this information on the back of the drawing is acceptable. However, for identification of the serial number, the PTO prefers that it be placed on the front.

c. *Drawings - Timeliness of Submission of Corrected Drawings in Allowed Cases*

When drawings need to be corrected in an allowed patent application, the applicant is *required* to submit *acceptable* corrected drawings within a three-month shortened statutory period. Within that three-month period, two weeks should be allowed for review of the correction by the Office. If a correction is determined to be unacceptable by the Office, the applicant must arrange to have an acceptable correction resubmitted within the original three-month period to avoid the necessity of obtaining an extension of time and of paying the extension fee. Therefore, the applicant should file corrected drawings as soon as possible following the setting of the three-month shortened statutory period.

Corrected drawings, as well as the issue fee should be addressed to Box Issue Fee. Note that any assignment document should be submitted in a separate envelope, addressed to Box Assigment.

Each piece of correspondence should carry its own certificate of mailing. For example, drawings should have a certificate of mailing and the issue fee should have a certificate of mailing.

d. *Papers Related to Patent Applications*

When a document concerns a previously filed application for a patent, it must identify on the top page in a conspicuous location, either the application number (consisting of the series code and the serial number, e.g., 07/123,456), or the serial number and filing date assigned to that application by the Patent and Trademark Office, or the international application number of the international application. *No papers related to a new patent application should be filed in the Office prior to receipt of this information.* [37 CFR

1.5(a)] Any correspondence not containing either the application number or the serial number and filing date will be returned to the sender when a return address is available.

The rule provides that if the correspondence is remailed to the PTO within two weeks of the mailing date of the PTO's cover letter returning the correspondence, the PTO will grant the benefit of the original date of receipt of the returned correspondence. If for some reason returned correspondence is resubmitted later than two weeks after the return mailing by the PTO, the resubmitted correspondence will be accepted, but given its date of receipt.

e. *Papers Related to Trademark Applications*

For all papers related to trademark applications, the word "Trademark" and the series code/serial number should be placed in the upper right-hand corner of the document. Also, please set forth the applicant's name, filing date, law office, examining attorney, and mark.

f. *Papers With No Particular Time Requirement*

Patent and trademark documents which have no particular time or sequence requirements should be filed with materials submitted in response to the statutory or regulatory requirements. Examples are certified copies of foreign documents to support priority in patent applications, changes of Power of Attorney, or changes in Mailing Address following first action.

g. *Response to Final Rejection In Patent Applications - Expediting Processing*

See section under Mail.

h. *Separation of Various Application Papers*

In *patent* applications, requests for extensions of time, changes of address, proposed drawing corrections, and petitions are sometimes incorporated in the remarks section or at the beginning of papers entitled "Amendment" or "Response." In trademark applications, change of address and powers of attorney are sometimes incorporated in the remarks section or at the beginning of papers entitled "Amendment" or "Response." Please present such items in separate papers, appropriately titled, since they are all handled by different personnel [37 CFR 1.4(c)].

i. *Supplemental or Preliminary Amendments*

Where a supplemental or preliminary amendment is found necessary in patent or trademark applications, please telephone the examiner and request that the examiner delay action for a certain time in order to avoid crossing in the mails of the amendment and the Office action.

j. *Transmittal Letters for Deposit Account Charges*

When statutory fees are to be charged to a deposit account, the processing of the application can be facilitated by submitting the applicant's transmittal letter or other correspondence specifying the account to be charged in triplicate. Submission of these documents in triplicate will eliminate the need for the Mail Room to photocopy the document and will thereby reduce the processing time of incoming mail.

k. *Unmatched/Unidentified Patent-Related Correspondence*

This notice is to alert all individuals and firms who send application-related correspondence/documents to the PTO of an April 30, 1990, ruling received from the National Archives and Records Administration (NARA) concerning unmatched/unidentified correspondence.

Since January 1, 1989, a rule has been in effect requiring all correspondence directed to the PTO concerning a patent application to include the application number which is comprised of both the series code and the serial number assigned to that application by the PTO (e.g., 07/123,456), or the serial number and filing date. Those papers that do not have this information are returned to the sender if a valid address is available. Those documents with no valid address are retained in an inactive status by the PTO.

Based on the recent ruling by the NARA, those papers which do not contain the application number and which have been in the Office for six months will be destroyed.

4. ASSIGNMENTS

a. *Assistance*

Customers are encouraged to call the Assignment Branch Records Control Status Section (703-308-3263) with questions regarding procedure, fees or status of assignments.

b. *Corrections in Recorded Documents*

When correcting errors in recorded documents, the following should be present:
—a new document signed by the same party or parties should be submitted for recording. The new assignment document should:
a. acknowledge and correct the error in the original document,
b. confirm title in the proper assignee, and
c. identify the incorrectly recorded document by reel and frame number
— contain a new recording fee
— if the correction pertains to either the name of a corporation or its state of incorporation, a certificate by the appropriate state agency is required specifying that on the date of execution of the previously recorded document no other corporation in that state held that name.

c. *Filming of Assignments - Submission of Multiple Copies*

The Office is now filming all papers received with a request to record an assignment. This includes the actual assignment document, any cover letters, and attachments. The Assignment Branch frequently receives multiple copies of papers submitted with assignment requests. In order to reduce the stamping and filming of multiple copies of documents, please do not send additional copies of the assignment itself or any attachments to it. Only one copy of the transmittal or cover letter should be submitted with the exception that when fees are to be charged to a deposit account, three copies should be provided to expedite processing.

d. *Foreclosures Affecting Patents and Trademarks*

To facilitate recording of foreclosures not signed by a debtor and to avoid unnecessary court proceedings, the Assignment Branch will record affidavits of foreclosure which are signed by the secured party and which include all of the following elements:
• A statement that a default has occurred which sets out the circumstances of default;
• Identification of the patent or trademark by application number, patent number or registration number;

VOL

UMI

• Reference to the recorded security agreement by reel and frame number;
• A statement that the patent or trademark has been legally foreclosed based upon applicable state law.
The above foreclosure procedures apply to both patents and trademarks.

e. *Foreign Assignees*
When filing a trademark assignment with a foreign assignee, an appointment of a domestic representative is required. The appointment of a domestic representative should be in a paper separate from the assignment document. If more than one property is included in the assignment, a separate appointment of domestic representative is required for each property. You need only submit one original appointment. Photocopies of the appointment of domestic representative may be filed for the additional properties.
For patents, 35 U.S.C 293 allows, but does not require, appointment of a domestic representative for foreign patentees.

f. *Routing of Assignment Documents*
Many individuals are submitting assignment documents and requests for assignment services, together with application prosecution papers, directly to the examiner. Often, these requests get placed in the file and are not forwarded to the assignment area for handling. Please send all assignment documents and requests through the Mail Room in order that they may be properly routed to the assignment area.
Please separate requests for certified copies of assignments from requests for other services including requests for certified copies of other documents. Certification of assignment documents is not performed by the same individuals as certification of other documents.

g. *Submission of Assignment Documents*
• Only an original document or an original certified copy of a document is acceptable for recordation. The document should be legible for filming purposes. When signing an original document, ink other than black should be used so that the signature can clearly be identified as an original one.
• Each assignment should be submitted with a cover letter. This cover letter should include, at a minimum:
—application, patent or registration number of the application, patent or registration being transferred;
—name of the party transferring the application, patent, or registration and to whom it is being transferred;
—brief description of what the document intends to accomplish (such as an assignment, a security agreement, or a license);
—total fee submitted or to be charged to a deposit account (at $8 per application, patent and registration being transferred) and the deposit account number. Avoid statements such as "Please charge the appropriate amount to my deposit accounts." However, you may authorize any additional fee to be charged to the deposit account to avoid receiving a non-recordation notice for insufficient fees.
— address to which the document should be returned after it is recorded by the PTO.
Cover letters should be formatted for easy reading.
• Each assignment should be accompanied by a separate cover letter. More than one application, patent, or registration can be identified in an assignment.
• If an assignment is submitted with a new application, send two separate cover letters - one for the application and one for the assignment.
• Assignment documents which transfer an interest in both patent and trademark matters are first processed through the automated patent assignment recordation system. This sequential processing causes a delay in returning these assignment documents. To avoid a delay, submit separate assignment documents, one for patent matters and one for trademark matters, each with its own cover letter.
• All assignments should be submitted on bond-weight paper that is no larger than 8 1/2" x 14." Only the front side of each sheet should be used, and a one-inch margin should be left on all sides of each sheet of paper.
• Assignments filed with new applications are stamped with the application number. Assignments of new applications not filed concurrently with the application should be held until the application number can be provided in the cover letter.
• All assignments should be mailed to BOX ASSIGNMENTS unless they are filed concurrently with a new application.
• Requests for assignment services (recordation, abstracts, certified copies) should be carefully proofread to ensure the document numbers and addresses are correct.

h. *Trademark Registrations - Ensuring Correct Printing*
To ensure the correct printing of ownership information on a Trademark Registration at issue date, provide the trademark examining attorney with the reel and frame number of the appropriate assignment document as soon as you are notified of it.

5. CERTIFICATES OF CORRECTION

a. *Accurate Requests*
Many requests for "Certificate of Correction" result from a perfunctory comparison of the issued patent with the attorney's application file, without investigating whether the recitation in the issued patent is correct. In many instances, change to the PTO file wrapper has been caused by the examiner prior to printing of the patent in order to make appropriate corrections to the file.

6. CERTIFICATION SERVICES

a. *Expedited Service for Patent Applications-As-Filed*
A request for Expedited Service may be obtained by paying $20 and sending your request to Box 10, Commissioner of Patents and Trademarks, Washington, D.C. 20231. A request for Expedited Service may also be obtained by hand carrying your request to the Office of the manager, Assignment & Certification Services Division, (Crystal Plaza 2, Room 5C-11) or to the Public Service Window in the Patent Search Room. When submitting requests for expedited certified copies of patent applications as filed, please include no more than three different application numbers on one request. The Certification Branch fills all copies from one request as a complete order. The Office's experience has been that orders which have no more than three application numbers can be filled and delivered most quickly within our five-day service goal; orders with a large number of individual application numbers often result in one or more applications requiring special research or handling which can slow the process. For example, better service can usually be given on five individual orders with three applications numbers on each one rather than one order with 15 application numbers on it.
In addition, some customers are using terms such as "rush" or "special" on every order they place; other customers use those terms to identify requests they want to be filled within five days. Please refrain from using the words such as "rush" or "special" and only use the term "expedite" when you have requested and paid for five-day expedited service.

b. *Methods of Ordering*
Mail Orders - The address for mail orders is:
Box 10
Commissioner of Patents and Trademarks
Washington, D.C. 20231

Hand-carried Orders - Hand-carried requests for certification service may be taken to the Public Service Window in the Patent Search Room where they can be placed in the Certification Order Receipt Box or given to the attendant, or they may be taken to the Manager, Assignment/Certification Services Division, CP2-5C11. For security reasons, the public is not permitted access to the Certification Branch itself.

c. *Processing Time*
The current goal for furnishing certified copies of applications-as-filed is 17 days from receipt in the Mail Room of the Patent and Trademark Office to mailing of the completed order by the Certification Branch. The 17 days includes 4 work days for Mail Room and Finance processing, 9 work days in the Certification Branch and 4 weekend days that accrue over the 13 work days.
The 17-day goal applies to those orders for which micro-fiche of applications-as-filed are available in the Certification Branch. The microfiche for a small percentage of the total orders for certified copies of applications-as-filed must be retrieved from a remote location, or be replaced due to damage or correction. The 17-day goal does not apply to these orders.

d. *PTO vs. Public-Supplied Copies for Certification*
Requests for all certified copies of applications-as-filed will be filled with PTO supplied copies of original source documents. No public supplied copies will be accepted.
The public may submit copies of Registered Trademarks, Registered Trademark Files, Patented Files, and Patents for certification by the Certification Branch.

e. *Questions Frequently Asked*
Q. What does "certified" mean?
A. Authentication of copies by ribbon and seal of the PTO with the signature of an officer authorized by the Commissioner of Patents and Trademarks.
Q. What does a patent application consist of?
A. (1) Written Description (2) Claims (3) Oath or Declaration (4) Drawings, when necessary, and (5) Filing Fee.
Q. What does a file wrapper and contents (file history) consist of?
A. The original application papers plus all correspondence between the applicant/attorney of record/assignee and the PTO.
Q. Why are certified copies of applications-as-filed required?
A. Since the rights granted by a U.S. patent extend only throughout the territory of the U.S. and have no effect in a foreign country, an inventor who wishes patent protection in other countries must submit a certified copy of his or her U.S. application when applying for a patent in that country in order to receive the benefit of the U.S. filing date.
Q. What regulations govern the filing of an U.S. application in a foreign country?
A. There is a treaty relating to patents which involves 97 countries and is known as the Paris Convention for the Protection of Industrial Property. It provides that each country guarantees to the citizens of other countries the same patent rights that it gives to its own citizens.
Q. Can anyone request a copy of a pending application?
A. No. Pending applications are preserved in secrecy. No information or copies may be obtained without written authority of the applicant or the owner unless necessary to carry out the provisions of any Act of Congress or in such special circumstances as may be determined by the Commissioner.
Q. Can orders for copies be placed by phone?
A. No. All orders must be in writing.
Q. May office copies of my application be sent to the PTO for certification?
A. No. We do not certify copies prepared outside the PTO.
Q. Will the PTO mail certified copies ordered directly to a foreign country?
A. No. With respect to the exportation of technical data, the PTO discontinued the practice of forwarding direct to any foreign country certified copies of U.S. applications ordered by residents of the United States.
Q. Are cited references in a file automatically furnished when a file wrapper and contents is requested?
A. No. Cited references are not included as papers comprising the file history. References cited are furnished only if specifically requested.
Q. Can cited references, when requested, be certified with the file wrapper and contents under one certificate?
A. No. Each reference must be certified separately.
Q. Are there instances when references are included in a file wrapper and contents?
A. Yes. If the references are submitted as attachments to a response from the applicant and if such response is entered and made a part of the file.
Q. Exclusive of applications-as-filed and file wrappers and contents of patented files, what other types of copies may be obtained from the Certification Branch?
A. The following items may be obtained:
(1) Certified copies of issued U.S. patents.
(2) Certified copies of foreign patents.
(3) Certified copies of publications from the Scientific Library.
(4) Certified copies of Office letters.
(5) Certified duplicate filing receipts.
(6) Copies of disclosure documents.
(7) Copies of the following files:
• Defensive publication files.
• Reexamination files.
• Interference files.
• Trademark files.
• Opposition files.
• Concurrent use proceedings files.
• Statutory Invention Registration.

f. *Requests for Certification Services*

(1)Use Complete Application Number

When ordering certified copies of patent and trademark applications, please identify the document by its complete application number. The application number includes the two digit series code (Examples: patent 06, 07; trademarks - 73, 74) and six-digit serial number.

(2) Authorization to Order Certified Copies of Applications as Filed

When requesting a certified copy of a patent application as filed, if either the attorney of record has changed since filing or a power to inspect has been filed, please provide a copy of the new power of attorney or the power to inspect. The Certification Branch prepares the bulk of certified copies of applications as filed from microfiche that contains information pertaining to the attorney of record at the time of filing. When a change in attorney of record is made, or when a power to inspect has been filed, this information is not readily available to the Certification Branch unless it is provided with the request.

(3) Ordering Different Products from Certification Branch

When ordering copies from the Certification Branch, whenever possible request only one type of service per order to speed processing. Example: a request for copy of a patent application as filed should be separate from a request for a patent file wrapper and contents.

g. *Refunds*

The U.S. Patent and Trademark Office is prohibited from providing refunds to customers except in situations where the Office failed to properly fulfill the request. The Certification Branch, therefore, cannot provide refunds for customers who no longer need a service or for "a mere change of purpose after the payment of money." See 37 CFR 1.26.

h. *Status Reguests or Problems*

For status inquiries, call the Input and Records Control Unit of the Certification Branch at 557-1587. For problem situations call the Manager of the Certification Branch, at 557-1552.

7. EXTENSIONS OF TIME IN PATENT CASES

a. *Appropriateness*

After a final rejection, where applicant's approval is not needed to amend the claims, no extension of time is required. However, if applicant's approval is required and applicants did not file their response within two months of the Final Rejection, the appropriate extension of time must be purchased.

Also, it should be noted that extensions of time may be requested under 37 CFR 1.136(a) for extending the time required to pay for the request for an oral hearing before the Board of Patent Appeals and Interferences. [MPEP § 1209]. The time for a request and fee for an oral hearing is one month from the date of the Examiner's Answer or within 3 months after the date of filing of a reply to a new ground of rejection.

Extensions of time by fee payment under 37 CFR 1.136(a) are appropriate for filing of the Brief on Appeal in regular applications. No more than four months may be granted under 37 CFR 1.136(a). Beyond those four months, any further request must show sufficient cause under 37 CFR 1.136(b), and no additional extension fee is required.

An extension of time is not required in order to hold an interview with the examiner. However, after the period for response has ended, an extension is required for the purpose of filing a follow-up amendment by applicant and/or for the entry of an Examiner's Amendment requiring approval of the applicant.

Extensions of time are appropriate for the purpose of achieving continuity between parent and continuing applications. A separate paper requesting the extension of time must be filed in the *parent* application. It would be useful to file a *copy* of that request or petition with the papers constituting the filing of the continuing application.

b. *Extensions of Time Under 37 CFR 1.136(a)*

Under 35 U.S.C. 41(a)(1) and 37 CFR 1.136(a), a response filed within a statutory period but outside of the period set for response may be rendered timely if accompanied by (1) a petition for an extension of time and (2) the appropriate extension fee. Experience indicates that there have been differing opinions as to the language necessary to constitute an acceptable extension of time petition. This Helpful Hint is intended to clarify the policy of the Patent and Trademark Office concerning the language required for such a petition.

An extension of time under § 1.136(a) requires a petition therefor and payment of the appropriate fee. The § 1.136(a) petition should explicitly request in writing an extension of time for the specific number of months needed as explained in § 710.02(e) of the Manual of Patent Examining Procedure. This is the best way to avoid mistakes by the applicant or by the Patent and Trademark Office and assure orderly and efficient processing of the petition.

The following language is an example of a preferred § 1.136(a) request:

Applicant petitions the Commissioner of Patent and Trademarks to extend the time for response to the Office action dated for month(s) from to

[If paying by check:]

Submitted herewith is a check for__ to cover the cost of the extension. (Optionally, add: Any deficiency or overpayment should be charged or credited to deposit account number . A triplicate copy of this sheet is enclosed.)

[If paying by charge to deposit account number:]

Please charge my deposit account number____ in the amount of____ to cover the cost of the extension. Any deficiency or overpayment should be charged or credited to this deposit account.

Applicants are cautioned that, in order to be timely, a response must be accompanied by a *specific* reference to an extension of time. A general authorization under 37 CFR 1.25(b) to charge necessary fees to a deposit account will not be interpreted as a petition for an extension of time. For example, a response accompanied by the statement "Please charge any fees necessary under 37 CFR 1.17 to my deposit account" would not be acceptable, since the statement does not make *specific* reference to an extension of time.

As previously indicated, a proper § 1.136(a) petition must be in writing. However, when an extension of time is necessary to make an Examiner's Amendment timely, the extension may be obtained by way of a verbal communication. The verbal communication must be transcribed as a written part of the official application file record. For example, during a telephone interview with an examiner, an attorney for the applicant, in order to render an Examiner's Amendment timely, may verbally request an extension of time under 37 CFR 1.136(a) and authorize a charge of the appropriate fee to his or her deposit account. If this verbal request and authorization are transcribed as a written part of the application file record (e.g., via the Examiner's Amendment or an Examiner Interview Summary Record, PTOL-413), the desired extension of time may be obtained. The filing date of the §1.136(a) petition and fee will be considered the date of the verbal request and authorization if this date is reflected in the written file record.

c. *Instances Not Permitted*

An extension of time under 37 CFR 1.136(a) is not permitted in the following instances:

(1) Where an applicant is so notified in an Office action as, for example, in a Reissue application involving a litigated patent.

(2) Where the application is involved in an interference declared pursuant to 37 CFR 1.611. See 37 CFR 1.645 for provisions governing extensions of ,time in interference proceedings.

(3) Where the response is to a decision by the Board of Patent Appeals and Interferences pursuant to 37 CFR 1.196, 1.197 or 1.304.

(4) In reexamination proceedings. See 37 CFR 1.550(c) for extensions of time in reexamination proceedings.

(5) In PCT international applications. See PCT Rule 26.2 for extensions for correction of PCT Article 14 defects in international applications before the Receiving Office.

d. *Insufficient Fees*

Many requests for extension of time are being filed with insufficient fees. In those instances where there is no authorization to charge an account, additional fees are necessary to cover the additional time consumed in making up the original deficiency. If the maximum, six-month period has expired before the deficiency is noted and corrected, the application is held abandoned.

Please note that effective November 5, 1990, the extension fees in patent cases are as follows:

	Small Entity	Non-Small Entity
One-Month Extension	$50	$100
Two-Month Extension	150	300
Three-Month Extension	365	730
Four-Month Extension	575	1,150

If applicants have a deposit account, it is recommended that applicants file, in an individual application, a general authorization to charge any of the fees set forth in 37 CFR §§ 1.16 to 1.18 to a deposit account for the entire pendency of the application.

e. *Policy*

Where an extension of time is required to file a response in a timely manner, the response is not considered complete until the response, fee, and request or petition for an extension of time are received. The fee and request or petition must be filed before the expiration of the extended period requested. The fee cannot be paid outside the statutory six-month limit for the period of response.

f. *Requirement for Request or Petition for Extension*

Submission of the appropriate extension fee under 37 CFR 1.136(a) is to no avail unless a request or petition for extension is filed. Frequently, the request is omitted, which then requires an additional extension fee to cover the period to the date of the request. Occasionally, the application is held abandoned because the six month maximum statutory period has expired before detection of the omission of the request for extension. It is critical that a paper specifically requesting the extension be filed with late responses. It is also wise to use the Certificate of Mailing practice under 37 CFR 1.8 when requesting extensions.

g. *Response to Final Rejection - Avoiding Extension Fees*

In patent applications wherein a three month Shortened Statutory Period (SSP) is set for response to a Final Rejection, the response would best be filed within two months of the date of the Office Action. If filed within two months, any Advisory Action mailed after the SSP expires will reset the SSP to expire on the date of the Advisory Action for extension fee purposes, but never more than six months from the date of the Final Rejection.

h. *Supplemental Amendments*

If a timely and complete response has been filed after a *Non-Final* Office Action, an extension of time *is not required* to permit filing and/or entry of an additional amendment after expiration of the shortened statutory period.

If a timely response has been filed after a *Final* Office Action, an extension of time is required to permit filing and/or entry of a Notice of Appeal or filing and/or entry of an additional amendment after expiration of the shortened statutory period unless the timely-filed response plaoed the application in condition for allowance. Of course, if a Notice of Appeal has been filed within the shortened statutory period, the period has ceased to run.

8. FILES

a. *Official Searches*

The PTO has had an unusually large number of official search status letters returned by the Postal Service due to insufficient/incomplete addresses. When requesting an official search for a lost patent or trademark file, please ensure that all pertinent information is completely filled out on the PTO Form 1216. In the case of an individual working for a particular firm, the firm's name should be included in block number 5 of the form along with the name of the requester. If you have any questions in this matter please call the Chief, Support Services Branch on (703) 557-3560.

b. *Requests for Reconstruction*

To request the reconstruction of a file, submit a written request along with a notice from the PTO Official Search unit stating that the file cannot be located.

c. *Requests for Trademark Files*

To eliminate unnecessary delays when ordering Trademark files, requesters should complete all required information blocks on form PTO-1538 (Order and Charge for Trademark Files). Failure to properly complete the form is the primary reason for requests not being quickly processed. Submitting a completed form will reduce the number of requests that have to be returned and thus reduce the overall time required to fill the request.

9. FILING RECEIPTS FOR PATENT APPLICATIONS

a. *Docket Numbers*

Docket numbers must be limited to a maximum of 12 characters to prevent truncation. The Patent Application Location and Monitoring (PALM) system data base allows a maximum of 12 characters for the attorney's docket numbers. Spaces, slashes and hyphens will no longer be included in the entered docket number on the official filing receipt. In an application where CASE or NAVY-CASE appears before the first character in the docket number, only the characters after CASE or NAVY-CASE will be entered on the official filing receipt.

b. *License to Foreign File*

Each newly filed patent application is routinely reviewed for security interests during pre-examination processing. A code is entered into the data base to indicate the presence or absence of security interests. When no security interests are found, the filing receipt will be generated with the notation "Foreign license granted xx/xx/xx." There is no additional cost for this security screening and license notation.

c. *Residence of Applicant*

The residence of applicant should be indicated as city and state for United States residents and city and country for residents of foreign countries. The Patent Application Location and Monitoring (PALM) System data base allows a maximum of 15 characters for the city of residence. If the city name is longer than 15 characters, it will be truncated in the data base and appear in the shortened form on the filing receipt. However, the entire city name will be taken from the file and printed on any patent that issues.

Please do not call or write the Office for a corrected filing receipt should the printed city name be cut short due to the 15-character limit.

Often applicants who are residents of foreign countries indicate street address, sections of cities, provinces or other political divisions as part of their cities of residence. This leads to confusion and possible erroneous entries in the data base. Only the foreign city and country should be indicated as the applicant's residence.

10.INTERVIEWS WITH PATENT EXAMINERS

a. *Appropriateness*

Prior to filing, no interview is permitted; only search assistance may be given to the attorney, searcher or inventor.

Prior to first action, an interview is ordinarily granted only in continuing or substitute applications; a request for an interview is untimely and will not be granted prior to first action in all other applications.

After final rejection, an interview will not be denied merely because final Office action has been rendered. Normally, one interview after a final rejection is permitted if the examiner is convinced that disposal or clarification for appeal may be accomplished with only nominal further consideration. In requesting an interview after final rejection, the intended purpose and content of the interview must be presented briefly, either orally or in writing. Interviews merely to restate arguments of record or to discuss new limitations which would require more than nominal reconsideration or new search will be denied.

After a case is sent to issue, it is technically no longer under the jurisdiction of the primary examiner (37 CFR 1.312). Requests for interviews on cases already passed to issue should be granted only with specific approval of the Group Director upon a showing in writing of extraordinary circumstances.

The ideal time for personal interviews, during which time an interview is clearly available, is the "Conference Period", which is the time between the filing of applicant's thorough first response to the examiner's first action on the merits and a concluding action by the examiner.

In reexamination proceedings, an interview with the owner is permitted after first action. Requests that reexamination requesters be permitted to participate in or attend interviews will be denied.

When an interference has been declared, all questions involved are to be determined *inter partes* and will not be discussed *ex parte*.

Following the grant of a United States Patent, an examiner must refuse to express any opinion or view as to the invalidity of the patent, except on the record in the course of examining a reissue application or a reexamination proceeding. Even in the case of search assistance on an invention, if an examiner is aware that the invention has been patented in the United States, the searcher will be referred to the prosecution file history, and the examiner will make no comment on the appropriateness of the search conducted or the references cited.

Should any examiner fail to comply with the above guidelines, the matter would best be brought to the attention of the examiner's Group Director.

Direct questions to: Al Lawrence Smith
Director, Group 350
(703) 308-1020

b. *Prohibitions*

No interview will be conducted with an attorney who is not registered or who has been suspended or excluded from practice regarding an application unless the attorney is the applicant in the application.

Protestors are not permitted to participate in interviews in applications where the protest was filed after December 8, 1981, and the examiner will not communicate in any manner with such protestors.

11. MAIL

a. *Certificate of Mailing - Separate Certificate for Each Document*

Practitioners and others are reminded of the requirement of MPEP 512(D) which state: "In situations wherein the correspondence includes papers for more than one application (e.g., a single envelope containing separate papers responding to Office actions in different applications) or papers for various parts of the Office (e.g., a patent issue fee transmittal form PTO-85 and an assignment), each paper must have its own certification as a part thereof or attached thereto." Although form PTOL-85b, Issue Fee Transmittal, may contain a Certificate of Mailing thereon, a separate Certificate of Mailing is required for all papers included with this form, including formal drawings, since papers are separated and flow to different areas of the Office. Checks submitted with papers do not require a Certificate of Mailing.

b. *Certificate of Mailing AND Return Postcard*

Use of the Certificate of Mailing Procedure is strongly encouraged.

37 CFR 1.8(a) provides for the use of a Certificate of Mailing on most correspondence with the PTO, whereby the correspondence (and/or fee) will be considered as timely filed if deposited with the U.S. Postal Service within the set time period. Consistent use of this procedure is extremely beneficial to practitioners, whether or not the Postcard Receipt provision of MPEP 503 is used.

In those instances where the PTO never receives the correspondence, no postcard receipt will be available to evidence the filing and/or timeliness of the correspondence. However, in those instances where a Certificate of Mailing is properly used, 37 CFR 1.8(b) provides relief, even if the correspondence is *not* received in the PTO at all. Under 37 CFR 1.8(b) the party who forwarded the correspondence need only (1) inform the PTO of the previous mailing of the correspondence, (2) supply a copy of the previously mailed correspondence and Certificate, and (3) include a declaration which adequately attests to the previous timely mailing.

c. *Correspondence with Certificate of Mailing Delivered by Commercial Carrier*

The benefits of 37 CFR 1.8 or 1.10 apply only to documents delivered to the PTO by the U.S. Postal Service.

A number of instances have been uncovered where individuals are certifying that documents were deposited with the U.S. Postal Service when, in fact, the documents were hand-carried or delivered to the PTO via commercial mail service, e.g., "Federal Express," "DHL," "Purolator," "Air Borne," "UPS," etc. In those instances where documents include a certificate of mailing under 37 CFR 1.8 or 1.10, but were delivered to the PTO by other than the U.S. Postal Service, Mail Room personnel are placing a notice indicating that fact on the correspondence involved to alert PTO personnel that the benefits of 37 CFR 1.8 or 1.10 do not apply.

d. *Courier Services*

If you plan to send a document via a private courier, the following address should be used to ensure proper receipt and handling:

Patent and Trademark Office
Correspondence and Mail Division
Crystal Plaza Building 2, Room 1A01
Arlington, VA 22202

e. *Expediting Handling of Trademark Applications*

To facilitate processing of new trademark applications, place them in a separate envelope apart from all other mail. Identify on the outside of the envelope "TRADEMARK APPLICATION ONLY." More than one new trademark application may be placed in the same envelope. Do not place any papers in the envelope other than those related to the new trademark applications.

f. *Express Mail*

Due to a failure to follow proper procedures, many applicants are losing the advantage of receiving the date a paper or fee was deposited at the Post Office when "Express Mail" is used. According to 37 CFR § 1.10, any such paper or fee must include a certificate of mailing by "Express Mail," signed by the person mailing the paper or fee.

To ensure papers and fees sent by "Express Mail" are accorded the proper certificate date, the following suggestions and reminders are offered:

(1) Each document must have a certificate of mailing typed on or affixed to the document. The certificate should be placed on the first page of the document or the covering letter to ensure easy accessibility. Often, the certificate is missing, illegible, inaccurate, incomplete, or difficult to locate. As a result, the paper or fee is considered to have been filed on the date of receipt in the PTO.

(2) The certificate must be legible.

(3) The Express Mail label number must be placed on the certificate.

(4) Dates on the certificate must correspond to dates on the Express Mail label. The PTO continues to receive correspondence filed under the provisions of 37 CFR 1.10 in which the certificate of mailing by "Express Mail" certifies that the correspondence is being mailed on one date while the "Express Mail" label shows a "Date-In" on a different date. This usually occurs when the "Express Mail" package is deposited in a remote "Express Mail" receptacle or mailbox after the last pickup, and accordingly is not being picked-up and processed by the Postal Service until the next business day. The question as to the treatment of such a situation was covered in the final rule making published on January 20, 1983, at 48 FR 2696-2714 and On February 10, 1983, at 1027 O.G. 9. The following comments appear therein.

"Comment: One person questions what treatment will be accorded a paper placed in an `Express Mail' box receptacle after the box has been cleared for the last time on a given day."

"Reply: The paper will be considered to be deposited as of the date of receipt indicated on the "Express Mail" mailing label by the Postal Service clerk."

It is recommended that when the filing date of a paper or fee is critical (e.g., the filing of a patent application, and particularly when the deposit by "Express Mail" is being made late in the business day), the correspondence should be personally delivered to a Post Office. There the date of receipt of the "Express Mail" package can be immediately indicated by the Postal Service clerk.

(5) Each certificate must have an original signature of the person *actually mailing* the paper or fee (i.e., the person who actually deposits the paper or fee with the U.S. Postal Service).

The PTO has encountered instances in which the certificate of mailing by "Express Mail" was signed by an attorney and the deposit was made by the attorney's secretary or another member of the attorney's staff. This is improper under the provisions of 37 CFR 1.10. This section differs in that regard from 37 CFR 1.8.

(6) The preferred wording and information to be included on the certificate is as follows:

"Express Mail" Mailing Label No. (insert B no. from Express Mail label)
Date of Deposit (insert date)
I hereby certify that this paper or fee is being deposited with the United States Postal Service's "Express Mail Post Office To Addressee" service under 37 CFR 1.10 on the date indicated above and is addressed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231.
(Typed or printed name of person mailing paper or fee)
(Signature of person mailing paper or fee)

By following these procedures, problems concerning filing dates should be minimized.

g. *Response to Final Rejections In Patent Applications - Expediting Processing and Reply by PTO*

In order to ensure the quickest reply to an amendment or response after Final Rejection in patent applications, the paper must be marked in the upper right portion:

"RESPONSE UNDER 37 CFR 1.116
EXPEDITED PROCEDURE
EXAMINING GROUP (Insert Group Number)"

VOL
1122
ISS
1
JA
1
1991
UMI

The marking on the paper preferably should be written in, highlighted by, or encircled with, a bright color felt-point marker.

The envelope in which the response is submitted must include only submissions under 37 CFR 1.116. The envelope must be marked "Box AF" in the lower left corner and must be addressed to:

Box AF
Commissioner of Patents and Trademarks
Washington, D.C. 20231

If the paper is being hand-carried to the Examining Group (instead of mailing to Box AF), the envelope, if any, and the response should both be marked:
"RESPONSE UNDER 37 CFR 1.116
EXPEDITED PROCEDURE
EXAMINING GROUP (Insert Group Number)"

Use of this procedure should avoid the necessity for extensions of time and the filing of unnecessary notices of appeal in many cases.

h. *Return Postcard*

If a receipt for any paper filed in the Patent and Trademark Office is desired, it may be obtained by enclosing with the paper a self-addressed postcard identifying the paper. The Patent and Trademark Office will stamp the receipt date on the card and place it in the outgoing mail.

The identifying data on the card should be so complete as to clearly identify the paper for which receipt is requested. For example, the card should identify the applicant name(s), serial number, filing date, interference number, etc. Also, the paper(s) should be identified by specifying the type thereof, namely affidavit, amendment, appeal, itemized components of applications, brief, drawings, fees, motions, supplemental oath or declaration, petition, etc.

A postcard receipt which itemizes and properly identifies the papers which are being filed serves as prima facie evidence of receipt in the PTO of all the items listed thereon on the date stamped thereon by the PTO unless the postcard receipt has been annotated by the PTO to indicate that one or more items were not received. A postcard receipt will *not* serve as prima facie evidence of receipt in the PTO if the papers are not itemized in a detailed manner, e.g., number of pages of specification and number of sheets of drawings, or if the postcard receipt has been annotated to indicate that one or more items was not received.

When papers for more than one application are filed under a single cover, a return addressed postcard should be attached to the paper for each application for which a receipt is desired.

i. *Secrecy - Related Papers (37 CFR 5)*

All correspondence in connection with 37 CFR 5 should be addressed to:

Commissioner of Patents and Trademarks
(Attention Licensing and Review)
Washington, D.C. 20231

Improperly addressing such correspondence may delay delivery and could result in violations of 37 CFR 5. See 37 CFR 5.33 regarding correspondence.

j. *Special Box - Box AF*

Since the establishment of the special box "Box Non Fee Amendment," some questions have been received as to which box should be used for amendments after final rejections. Continue to use Box AF for amendments after final rejections, even if it is a non-fee amendment. Although mail delivery by the Mail Room should be the same in either case, the Patent Examining Group will expedite those labeled Box AF.

k. *Special Box - Box Assignments*

To ensure proper routing of patent and trademark assignment other than those filed with new patent applications, please place in a separate envelope addressed "Box Assignments" and use the words "Box Assignments" on transmittal letters for assignment documents. Do not put any other type of documents in the envelope.

Box Assignments cannot be used for assignments filed with new patent applications because these assignments remain with the patent applications until bibliographic data is key entered and the filing receipts are mailed. The bibliographic data keyed for filing receipts is then available in the automated patent assignment system for use in processing patent assignment documents.

l. *Special Box - Box Re-exam*

Requests for re-examination should be clearly marked "Box Reexam" on the outer envelope, and include only requests for re-examination. The goal for processing requests for re-examination is 30 days from receipt in the Mail Room to delivery to the appropriate examining group. Requests for re-examination which are marked on the outside envelope for Box Re-exam are immediately placed in a special box for pick up by re-examination processing clerks twice daily. Properly marked requests for re-examination allow us to meet the 30-day goal and allow the examiner adequate time for considering the request.

If requests for re-examination are included in packages with other mail, the entire package will be placed with the thousands of pieces of mail received on that date to be opened in date order. Reexamination requests are, therefore, delayed for several days making the 30-day goal nearly impossible to meet, and often reducing the time available for the examiner's consideration of the request.

m. *Special Designations for Mail*

Special PTO mail department numbers should be used to allow forwarding of particular types of mail to the appropriate areas as quickly as possible. Such mail is forwarded directly to the appropriate area without being opened. Only the specified type of document should be placed in an envelope addressed to one of these special departments. If any documents other than the specified type identified for each department are addressed to that department, they will be significantly delayed in reaching the appropriate area for which they were intended.

The following special department should be used only for their specified purpose. Address mail as follows:

Commissioner of Patents and Trademarks
Box
Washington, DC 20231

Box 3 - Mail for the Office of Personnel for NRC.
Box 4 - Mail for the Assistant Commissioner for External Affairs and the Office of Legislation and International Affairs.
Box 5 - "No fee" mail related to trademarks.
Box 6 - Mail for the Office of Procurement.
Box 7 - Reissue applications for patents involved in litigation and subsequently filed related papers.
Box 8 - All papers for the Office of the Solicitor *except* communications relating to *pending litigation*.
Box 9 - Coupon orders for U.S. patent and trademark copies.
Box 10 - Orders for certified copies of patent and trademark applications.
Box 11 - Electronic Ordering Service (EOS).
Box 12 - Contributions to the Examiner Education Program.
Box 13 - Mail for the Employee and Labor Relations Division.
Box 14 - Invoices directed to the Office of Finance.
Box 171 - Vacancy Announcement Applications.
Box 200 - Mail related to PTO's Bicentennial celebration.
Box AF - Expedited procedure for processing amendments and other responses after final rejection.
Box EEO - Mail for the Office of Equal Employment Programs.
Box Assignment - All assignment documents except those filed with new applications.
Box FWC - Requests for File Wrapper Continuation Applications (under 37 CFR 1.62)
Box Interference - Communications relating to interferences and applications and patents involved in interference.
Box Issue Fee - All communications following the receipt of Fee a PTOL-85, "Notice of Allowance and Issue Fee Due," and prior to the issuance of a patent should be addressed to Box Issue Fee, unless advised to the contrary. Assignments are the exception. Assignments should be submitted in a separate envelope and not be sent to Box Issue Fee.
Box ITU - All intent to use documents, excluding the initial application and amendments to allege use.
Box M.Fee - Correspondence related to a patent that is subject to the payment of a maintenance fee.
BoxNon-Fee Amendment- Non-fee amendments to patent applications. (Use Box AF for responses after final rejection).
Box OED - Mail for the Office of Enrollment and Discipline.
Box PATENT- New patent application and associated papers and fees.
APPLICATION
Box TRADEMARK - New trademark application and associated papers and fees.
APPLICATION
Box Patent Ext.- Applications for patent term extension.
Box PCT - Mail related to applications filed under the Patent Cooperation Treaty.
Box Reexam- Requests for Reexamination for original request papers *only*.
Box SN - For fee and petitions under 37 CFR 1.182 to obtain date received and/or serial number for patent applications *prior* to the Office's standard notification (return post card or the official "Filing Receipt," "Notice to File Missing Parts," or "Notice of Incomplete Application").

12. MAINTENANCE FEES

a. *Address to Which Correspondence is Sent Regarding Patent Maintenance Fees*

Under 37 CFR 1.33(d), a "correspondence address" or change thereto may be filed with the Office during the enforceable life of a patent. This "correspondence address" will be used in any correspondence relating to maintenance fees unless a separate "fee address" has been specified solely for maintenance fee purposes as provided by CFR 1.363. Practitioners who do not wish to receive correspondence relating to maintenance fees must change the correspondence address in the patented file or provide the PTO with a fee address to which the correspondence should be sent. It is not required that a practitioner file a request for permission to withdraw pursuant to 37 CFR 1.36 solely for the purpose of changing the correspondence address in a patent, even though a withdrawal of a practitioner would change the correspondence address.

b. *Correspondence Address and/or Fee Address on Maintenance Fees*

Effective November 1, 1984, 37 CFR 1.363 provides for a "fee address" to be entered in the Office patent file records for use in all correspondence relating to maintenance fees. The fee address is in addition to the "correspondence address" under 37 CFR 1.33. The "correspondence address" will continue to be used for all reexamination and interference purposes. If no separate fee address is specified, the correspondence address will also be used for maintenance fee correspondence. A similar reminder appears on the Issue Fee Transmittal Form, PTOL-85(b).

Practitioners should maintain a current "correspondence address" and, if desired, a separate current "fee address" during the enforceable life of the patent in order to ensure receipt of correspondence regarding maintenance fee.

Practitioners are reminded that they are obliged to inform a client or former client (or timely notify the Office of an inability to notify a client or former client) of any maintenance fee correspondence received from the PTO. See 37 CFR 10.23(c)(8). This is similar to the practice with respect to interferences and reexamination proceedings.

Practitioners who do not wish to receive correspondence relating to maintenance fees must change the correspondence address in the patented file or provide the PTO with a "fee address" to which such correspondence should be sent.

It is not required that a practitioner file a request for permission to withdraw pursuant to 37 CFR 1.36 solely for the purpose of changing the correspondence address in a patent even though a withdrawal of a practitioner would change the correspondence address. However, a request for permission to withdraw pursuant to 37 CFR 1.36 must be filed in the patent if the attorney or agent of record does not desire to receive correspondence relating to reexamination.

c. *Delayed Payment of Maintenance Fees*

Payment of any maintenance fee due on a patent after expiration of the patent may be accepted if the conditions set forth in 37 CFR 1.378 are satisfied. In the past, petitions under 37 CFR 1.378 to accept delayed payment of the maintenance fee in an expired patent have been filed which allege, as a basis for unavoidable delay: (1) lack of knowledge that a maintenance fee was due and/or (2) failure to receive a Maintenance Fee Reminder notice from the PTO.

Practitioners are reminded that a patentee's lack of knowledge of a requirement to pay a maintenance fee does not constitute a showing of unavoidable delay; see 49 F.R. 34716 at page 34720, and 1046 O.G. 28 at page 32.

Maintenance Fee Reminder notices are mailed only as a courtesy after the "grace period" has begun; see 37 CFR 1.362(e). Patentees are expected to maintain their own docket systems to ensure timely payment of maintenance fees, preferably during the "window period"; see 37 CFR 1.362(d). Since patentees are expected to maintain their own docket systems for timely payment of maintenance fees, proof that a Maintenance Fee Reminder notice was not received from the PTO does not constitute a showing of unavoidable delay; see 49 F.R. 34716-34726, and 1046 O.G. 28-37.

VOL 1122 ISS 1 JA 1 1991 UMI

Practitioners are cautioned that any petition to accept delayed payment of a maintenance fee under CFR 1.378 must include an enumeration of the steps taken to ensure timely payment of the maintenance fee. In this regard, the petition should include a detailed explanation of the docket system employed to ensure such timely payment. Any petition filed more than six months after the expiration of a patent will also be required to show that the failure to timely pay the maintenance fee was due entirely to circumstances outside the control of the patentee and those acting on behalf of the patentee.

d. *Maintenance Fee Transmittal Form Notice*

Where maintenance fee payments are to be made by authorization to charge a deposit account, the Maintenance Fee Transmittal Form, should reflect both the Payor's Name *and* signature in the bottom left corner thereof.

e. *Mandatory Identifiers when Submitting Maintenance Fees*

Practitioners are reminded that a patent maintenance fee payment and any surcharge payment submitted must identify the patent to which it relates by at least *two mandatory identifiers* [see 37 CFR 1.366(c)]:

1. The patent number; and
2. The serial number of the United States application for the patent on which the maintenance fee is being paid.

Reissue patent maintenance fee due dates are based on the issue date of the original, rather than the reissue patent. The payment must identify the reissue patent by reissue patent number and reissue application serial number as the two mandatory identifiers and should also include the original patent number, the original patent issue date and the original United States application filing date. See 37 CFR 1.366(d).

The two mandatory identifiers are required as a minimum to enable a cross-check to be made to avoid errors in crediting payment of maintenance fees.

It is suggested that the payment identify the fee being paid for each patent as to whether it is the 3 1/2, 7 1/2 or 11 1/2 year fee; whether small entity status is being changed or claimed; the amount of the maintenance fee and any surcharge being paid; any assigned payor number; the patent issue date; and the United States application filing date. See 37 CFR 1.366(d).

Failure to provide at least the two above-named mandatory identifiers will likely result in the non-acceptance of the maintenance fee payment. The date the two mandatory identifiers and the required fee are submitted is the date the maintenance fee payment is credited as being made.

f. *Payor Number*

In order to simplify changes in address by patent owners having several patents, and data input by the Patent and Trademark Office, a "payor number" will be assigned to each fee address when a fee address is presented to the Office in a patent or earlier upon request. A request for a payor number before a maintenance fee is paid or due will permit a patent owner to request that the fee address and payor number be recorded in the Office records of the patents owned on which maintenance fees are due so that all notices relating to maintenance fees will be sent to the fee address.

When a fee address has been specified as provided by 37 CFR 1.363, that address is assigned a "payor number". Processing time can be greatly reduced if practitioners cite that "payor number" when submitting a maintenance fee payment.

The Patent and Trademark Office has established a procedure for assigning a payor number upon request by a patent owner or a party responsible for paying maintenance fees. Such a party may be, for example, the finance office of a corporation or of a separate organization specializing in maintenance fee payments.

Under the procedure, a patent owner or other party may request a payor number for a particular fee address by writing to:

Commissioner of Patents and Trademarks
Box M. Fee
Washington, DC 20231

Each request for a payor number should include the:

- fee address to be used by the Office, and
- telephone number of the fee addressee to be used to resolve problems.

After receipt of a payor number, it may be used to indicate to the Patent and Trademark Office the fee address to be used in particular patents on which maintenance fees will become due and in applications in which issue fees have been or are being paid. Any request for entry of a payor number or fee address in the Office records of a patent, however, must be signed by the patent owner or his or her attorney or agent of record.

After a payor number has been assigned, it should be used in all future maintenance fee payments and related correspondence. However, where a payor number has not been previously entered in the Office records for a particular patent, the mere indication of a payor number at the time of payment of the maintenance fee, without the signature of the patent owner or the owner's attorney or agent of record, will not serve to make the payor number of record in the Office for that patent.

The problems which most often arise in connection with attempts to establish a fee address in a particular patent or group of patents is that the request is being signed by an attorney who is not of record in each of the patents. This results in the request being entered only in part.

Also, when the request is signed by an owner of the patent, the records of the Assignment Branch do not always reflect such ownership. Where the assignment was recorded prior to December 1980, it would help the Office if the PTO reel and frame number of the assignment recordation were presented in the paper requesting that a fee address be entered, and if the person signing the request would indicate his or her title.

g. *Public Availability of Maintenance Fee Petitions/Decisions*

Maintenance fee petitions and decisions thereon are public records. Copies thereof can be obtained by submitting a written request to the Certification Branch. The request should state the patent number and serial number. The charge for the copies is currently $.50 per page.

13. PATENT APPLICATIONS (NEW)

a. *Attorney Docket Number on Incomplete/Missing Parts Notices*

In response to several requests from patent attorneys, the PTO is now entering the attorney docket number on the Notice of Incomplete Application and Notice to File Missing Parts of Application.

The attorney docket number which will be entered on the Notice will be that which was submitted on the transmittal letter as filed with a new patent application. The number must be clearly identified as an "attorney docket number."

If the Office makes a mistake in recording the attorney docket number on the Notice of Incomplete Application or the Notice to File Missing Parts of Application, such mistake is not to be used by the attorney as cause for delay in response. Nor is the attorney

to request that the Office correct the docket number prior to response to the Notice. The attorney can notify the Office in the response, but no change will be made by the Office until the Filing Receipt is issued.

If the attorney wishes to change the attorney docket number from that which was entered on transmittal letter as filed, the request must be submitted through amendment, submitted to the Patent Examining Corp.

b. *Computer Program Listings*

Computer program listings may be submitted in patent applications in the following forms:

If a computer program listing is contained on 10 printout pages or less, it must be submitted either as drawings or as part of the specification. If submitted as drawings, the listing must comply with the requirements for drawings as provided in 37 CFR 1.84. If submitted as part of the specification, regardless of the number of printout pages, it must be in the form of computer printout sheets (commonly 14 by 11 inches in size) for use as "camera ready copy." Such computer printout sheets must be *original* copies from the computer with dark solid black letters not less than 0.21 cm high, on white, unshaded and unlined paper. The printing on each sheet must be limited to an area 9-inches high by 13-inches wide, and the sheets should be submitted in a protective cover.

If the computer program listing printout is 11 or more pages long, applicants may submit such listing in the form of microfiche. Such microfiche filed with a patent application is to be referred to as a "microfiche appendix." This appendix will not be part of the printed patent. Microfiche submission requirements must be in accordance with the provisions contained in 37 CFR 1.96(b)(2).

c. *Continuation or Divisional-Retaining Original Claim*

When filing under Rule 1.60, retain at least one original claim from the parent application to assure a complete application. Only amendments reducing the number of claims or adding a reference to the prior application [Rule 1.78(a)] will be entered, upon request, before calculating the filing fee and granting the filing date. *Reminder*: Applicant cannot file a CIP (continuation-in-part) under Rule 1.60.

d.*Continuation or Divisional-Problems*

Applications are often filed incorrectly under 37 CFR 1.60. This causes problems not only for applicants but also for the Patent and Trademark Office. Filing dates are not granted to applications which do not comply with the rules. As a result, petitions with fees are required to be filed in such applications before a filing date will be granted.

Most often, the problems that arise in this area can be characterized as the following:

(1) Applicants continue to fail to comply with the requirements of 37 CFR 1.60 with regard to what must be submitted upon filing under the rule. This is true even after the clarifying amendments (effective April 1, 1984) were made to the rule.

A true copy of the prior application must be filed including the specification (with claims), drawings, oaths or declaration showing the applicant's signature or an indication it was signed, and any amendments referred to in the oath or declaration filed to complete the prior application.

(2) Applicants are using transmittal forms which request filings under 37 CFR 1.62 when it was really desired to file a divisional application under 37 CFR 1.60 and not to abandon the parent application.

e. *Docket Numbers-Placement*

If use of a docket number is desired, the docket number should be placed in the upper right corner of the transmittal letter accompanying newly filed patent applications. This will eliminate a time consuming search of the application papers for the docket number or the likelihood of it being overlooked during processing.

f. *Drawings in Applications Filed After January 1, 1989*

The general rule applicable to release of any paper in a patent application file is that no paper (including a drawing) will be returned for any purpose whatever. 37 CFR 1.59. New rules published in the *Official Gazette* [1097 OG 36 (December 13, 1988)] effective January 1, 1989, no longer require the submission of original (master) drawings in a patent application. Since corrections are the responsibility of the applicant, the original drawing(s) should be retained by the applicant for future correction, if necessary.

As a result of adoption of these new rules relating to drawings, the Patent and Trademark Office will no longer release to applicants, bonded drafting companies or others, drawings from patent applications filed after January 1, 1989, and after January 1, 1991, no drawings may be borrowed from the Office.

Access to applications is still provided with the proper power to inspect. If copies of any papers or drawings within the application are required, arrangements may be made through the File Information Unit and copies may be made in the Public Search Room. If there is some extraordinary situation that requires release of an original drawing in possession of the Office, relief may be requested by filing a petition under 37 CFR 1.183.

g. *Drawings-Proper Identification*

During pre-examination processing, drawings are temporarily separated from the rest of the application papers. To facilitate the matching of drawings with the application, it would be helpful if the applicant's name, docket number, and the title of the invention were put on the back of the drawings. This may be done by writing lightly on the drawings or by using gum labels.

h. *File Wrapper Continuation-Preliminary Amendment*

Many continuation applications filed under 37 CFR 1.62 contain no preliminary amendment to the claims which were finally rejected in the parent application. The result is a first action final rejection of these claims. Applicants should file any desired amendments at the time the application is filed under 37 CFR 1.62, since the Office is treating these applications as "Special" and an action on the merits will be rendered quite promptly.

To expedite processing under Rule 1.62, make certain that the parent serial number cited in the transmittal letter is the correct serial number.

i. *File Wrapper Continuation-Problems*

Applications continue to be filed incorrectly under both 37 CFR 1.60 and 37 CFR 1.62. Filing dates are not granted to applications which do not comply with the rules. As a result, petitions with fees are required to be filed in such applications before a filing date will be granted.

The problems that most frequently arise in this area can be characterized as the following:

(1) Applications have been filed with a transmittal form requesting filing under 37 CFR 1.60 when it was intended to file under 37 CFR 1.62. The confusion in the record of such applications must be clarified by a decision on petition before the applications can be processed for examination.

(2) Some applicants fail to realize that the parent application is abandoned by the filing of a continuing application under 37 CFR 1.62. Paragraph (g) of 37 CFR 1.62 states:

"The filing of a request for a continuing application under this section will be considered to be a request to expressly abandon the prior application as of the filing date granted the continuing application."

VOL

ISS

JA

UMI

Correction after such a mistaken filing under 37 CFR 1.62 usually requires a revival of the parent application under 37 CFR 1.137(a) or (b) which expends resources of both the applicant and the PTO.

(3) Some applicants are attempting to file continuing applications under 37 CFR 1.62 after payment of the issue fee in the parent application. Such applications are improper and are not entitled to a filing date. Additionally, such filings will not affect the prior application; i.e., the parent application may issue as a patent. Paragraph (a) of 37 CFR 1.62 specifies that continuing applications may be filed under 37 CFR 1.62 "before the payment of the issue fee, abandonment of, or termination of proceedings on the prior application."

(4) Some applicants are attempting to file continuation-in-part applications under 37 CFR 1.62 with a new specification rather than with the changes made by amendment to the prior application. As stated in 37 CFR 1.62(a), filings under 37 CFR 1.62 use the specification of the prior application.

Paragraph (c) of 37 CFR 1.62 also states:

"In the case of a continuation-in-part application which *adds and claims additional disclosure by amendment*, an oath or declaration as required by § 1.63 must also be filed..." (emphasis added)

(5) The request for a FWC *must* contain the original signature of the inventor, assignee, attorney or agent of record, or attorney or agent filing under representative capacity. [1.34(a)]

j. *Information Disclosure Citation-Form PTO 1449*

The Public is encouraged to use Form PTO 1449, "Information Disclosure Citation," when preparing a statement under 37 CFR 1.97-1.99 (see MPEP § 609). This form provides the Office with a uniform way of listing the citations and a vehicle from which the information thereon can be printed on the issued patent.

Some citations are being presented on various forms prepared by the public rather than on Form PTO 1449. As a result, delays are cropping up in the printing process because the printer has difficulty in following the various formats and is having to query the examiner each time a non-PTO 1449 form is used.

Note that listing citations on Form PTO 1449 does not raise an irrebuttable presumption that the citation is prior art. A holding by an examiner that any citation on Form PTO 1449 is prior art to claimed subject matter can be rebutted by procedures commonly used to rebut the prior art status of an examiner's citations on Form PTO 892, "Notice of References Cited".

Among the information that should be provided on Form PTO 1449 is the date of publication of the citation. In addition, it is helpful if the class and subclass of each citation is provided. It is appreciated that classification information may not be known at the time Form PTO 1449 is prepared. When classification information is not known, draw a line in the boxes under the class and subclass heading adjacent to the citation for which classification information is not known.

k. *Petition for License*

Rule 5.12 states that "filing of an application for patent for inventions made in the United States will be condsidered to include a petition for license under 35 USC 184 for the subject of the application. The filing receipt will indicate if a license is granted." There is no need to request a corrected filing receipt deleting the words "License Granted." Its intent is to provide the necessary acknowledgement for those filing abroad.

l. *Processing and Retention Fees for Abandoned Applications*

An application, which has become abandoned pursuant to 37 CFR 1.53(d) for failure to pay the filing fee, will be disposed of unless the processing and retention fee set forth in § 1.21(1) is paid within the 1-year period referred to in § 1.53(d). Moreover, the processing and retention fee must be timely paid in order to obtain certified copies of the application (e.g., for convention priority purposes) or to establish in a later filed application the filing date benefit of an earlier copending application under 35 USC 120 and 37 CFR 1.78(a)(3). Therefore, an application which has become abandoned for the reasons set forth above should be immediately reviewed in order to timely determine the advisability of submitting a processing and retention fee payment.

m. *Residence of Applicant*

The residence of applicant should be indicated as city and state for United States residents and city and country for residents of foreign countries.

n. *Surcharge for Filing a Patent Application*

Filing dates are accorded to applications filed without the basic filing fee and without the oath or declaration. In such cases, a notice is mailed by Application Division requiring at least the basic filing fee and the oath or declaration, accompanied by a surcharge [37 CFR 1.16(e)]. In numerous instances, applicants fail to submit the surcharge causing the application to become abandoned. See 37 CFR 1.53(d) and MPEP § 506.

14. PATENT COOPERATION TREATY APPLICATIONS

a. *Correction of Errors in the Description, Claims or Abstract and Correction of Article 14 Defects*

When corrections of PCT Rule 91 obvious errors in the description, claims or abstract are submitted together with corrections of defects under PCT Article 14, the transmittal letter should clearly note the Rule 91 corrections. This is necessary because, under PCT Rule 91.1(e), the Receiving Office can authorize the rectification of obvious errors only in the Request (Form PCT/RO/101), while Searching Authority authorization is needed for obvious errors in the description, claims or abstract. When the transmittal letter clearly notes the Rule 91 corrections, Searching Authority authorization of any obvious errors in the description, claims or abstract can be expedited.

Call PCT on 603-0465 if you have questions concerning responses filed during the international stage for international applications under the PCT.

b. *Early Notification of Receipt of PCT Designated Office Cases*

If you would like to have early notification that the PTO has received requirements under 35 U.S.C. 371 to enter the Designated Office phase, you should send two self-addressed, stamped postcards with those requirements. The first postcard will be date stamped and returned to you upon receipt of the requirements by the PCT staff. The second postcard will be sent to you when the case is released to the Mail Room to join the regular flow of national applications. The second postcard will be stamped with the U.S. serial number. If only one postcard is sent, it will be marked with the U.S. serial number but will remain with the application until the 35 U.S.C. 371 requirements are completed and the case is released.

c. *Responses Filed in International Applications*

The 18-month publication deadline for international applications filed under the Patent Cooperation Treaty (PCT) is critical. Therefore, it is in applicant's interest to respond timely to an invitation to correct a PCT Article 14 defect. An untimely response can result in the withdrawal of the international application under Article 14 and PCT Rule 26. If an extension to respond is needed, submit a written request before the expiration of the time limit. The PTO will strictly comply with PCT article 14 and Rule 26 in holding international applications withdrawn when responses are untimely or not filed.

d. *Oath or Declaration*

The U.S. Patent and Trademark Office is continuing to receive oaths or declarations for applications entering the national stage of the Patent Cooperation Treaty under 35 U.S.C. 371, which do not comply with the rules and regulations. The statute requires at 35 U.S.C. 371(c)(4): "an oath or declaration of the inventor...complying with the requirements of section 115 of this title and with regulations prescribed for oaths or declarations of applicants." Applicants are reminded that oaths or declarations filed pursuant to 35 U.S.C. 371(c)(4) must strictly adhere to the requirements set forth in 37 CFR 1.497 and 1.63. The following are examples of the most common defects:

(1) The oath or declaration fails to adequately identify the specification to which it is directed (see MPEP § 601.01).

(2) The oath or declaration fails to identify each inventor and the residence and country of citizenship of each inventor.

(3) The oath or declaration fails to identify the foreign application for patent on which priority is claimed by specifying the application number, country, day, month and year of its filing.

Failure to file an oath or declaration in compliance with the above noted provisions results in abandonment as provided by 35 U.S.C. 371(d).

15. PATENT COPIES

a. *Coupon Ordering Service*

Some problems being experienced in successfully filling coupon orders are:

. No return address or Box Number

. Incorrect return address or Box Number

. Missing name of person(s) ordering copies. (Although the PTO attempts to send such orders, they are frequently returned by the receiving organization).

. Failure to identify whether request is for patent, trademark, or design copy.

. Failure to identify the patent, trademark, or design number being requested. Identification by application serial number is not acceptable.

. Inappropriate use of coupon for ordering a foreign patent. (Foreign patents are $10 per copy and should be ordered through the Scientific Library).

. Insufficient payment (Any coupons valued less than $1.50 must accompany additional payment by check, money order, or additional coupons).

To ensure coupon orders can be successfully filled, please include a patent/trademark/design number, complete name, return address/box number, and the sufficient fee.

b. *Electronic Ordering Service*

Copies may be ordered electronically through the PTO's Electronic Ordering Service (EOS) rather than placing orders through the mail. Two types of EOS service are available: EOS regulars and EOS specials. Both reduce the amount of time required to fill orders. Turnaround time for filling orders received through the mail is approximately four weeks: an average of seven days for us to receive the order through the mail, up to 14 calendar days for the order to be processed, and about seven days for the order to be delivered through the mail. With EOS, the orders are received the same day they are placed, thus reducing the turnaround time by seven days. Depending on the size of the order and the age of the documents requested, an EOS regular order can take from one to 14 days to process and about seven days to be delivered through the mail. EOS regular orders may also be delivered to rental boxes at the PTO's Public Service Window which eliminates the seven-days in the mail.

EOS specials provide the capability to order document copies on-line and receive the order within two business days.

Orders can be placed 24 hours a day, seven days a week.

To use EOS, you need a standard computer terminal and modem. If you have any questions about equipment or the technical aspects of EOS, call (202) 377-2535.

The copy costs are $1.50 for each patent and trademark and $10 for each plant patent. The cost per copy for EOS specials is $25. In addition, there is a communication cost of approximately $.25 per minute of connect time.

Regulations require that we receive payment for services before they are rendered. For this reason, a PTO deposit account is a prerequisite for using the EOS. There are two types of PTO deposit accounts.

One is an unrestricted account which can be used for any PTO service. The unrestricted account requires a minimum balance of $1,000. The second is a restricted deposit account which is available only for EOS and for subscriptions for copies of newly issued patents by subject-matter classification. The restricted account requires a minimum balance of $300.

If you would like to use the EOS or have questions, call (703) 603-0696.

c. *Subscription Services*

When submitting changes to subscription accounts, allow approximately two months from the date mailed to the Patent and Trademark Office for changes to become effective. Two months are required to record changes, enter data, and update the automated system. If you need assistance in the servicing of your account or would like to become a subscription customer, call (703) 603-0696.

16. PETITIONS TO REVIVE

a. *Request and Fee for Extension Not Required*

Frequently, a petition to revive an abandoned application is accompanied by an unnecessary request and fee for extension of time. Our policy is set forth in MPEP 711.03(c). Specifically, a response does not require a request and fee for extension of time as a condition of revival.

b. *Terminal Disclaimer*

A petition to revive an abandoned application is often accompanied by an unnecessary terminal disclaimer. A terminal disclaimer is required only when a grantable petition based on *unavoidable delay* is not filed within six months of the date of abandonment [37 CFR 1.137(a) and 1.137(c)] . It follows that a terminal disclaimer should not accompany a petition based on *unintentional* abandonment [(37 CFR 1.137(b)]. In these respects, analogous reasoning applies to petitions to accept late payment of the issue fee under 37 CFR 1.155 or 1.316.

When a terminal disclaimer is a necessary component of the petition, the period to be disclaimed must equal the number of months between the date of abandonment and the date a grantable petition is filed. The date of abandonment is the date the period for response

VOL 1122 ISS 1 JA 1 1991 UMI

has expired [see MPEP 711.04(a)]. This is normally the end of the three month shortened statutory period. Moreover, the terminal disclaimer should employ the format shown in FIG. 1.

POWER TO INSPECT

a. *Power of Attorney*

The Office receives letters granting power to inspect patent applications. Power to inspect may only be properly granted by the agent or attorney of record, the inventor, or the assignee of record. Sometimes the person signing the power is not authorized to do so. The most frequent error in this regard is an attempt, by a person who was properly granted a power to inspect, to assign or delegate or grant the power to a third person. This does not comply with 37 CFR 1.14(a) and merely causes a delay until proper authorization is received.

Copies of completed applications cannot be made during the pre-examination process. Although these can be inspected, they may not be pulled from the work flow in order to have copies made.

b. *Withdrawal of Attorney*

To expedite requests for permission to withdraw as attorney under 37 CFR § 1.36, submit the request in triplicate (original and two copies) and indicate thereon the present mailing addresses of the attorney who is withdrawing and of the applicant. The examining group number should also appear on all such requests. Because the Office does not recognize law firms, each attorney of record must sign the notice of withdrawal, or the notice of withdrawal must contain a clear indication of one attorney signing on behalf of another.

A request to withdraw is effective when approved rather than when received. This is particularly important when such requests are submitted toward the end of the period for response. There should be at least 30 days between approval of withdrawal and the expiration date of a time response period so that the applicant will have time to obtain other representation or take other action. If less than 30 days remains in a running response period, a request to withdraw is normally disapproved.

If a period has been set for response and the period may be extended [without a showing of cause pursuant to 37 CFR 1.136(a)] by filing a petition for extension of time and fee, it is not necessary to seek such extension of time for withdrawal to be approved. In such a situation, however, withdrawal will not be approved unless at least 30 days would remain between the date of approval and the last date on which such a petition for extension of time and fee could properly be filed.

18. PRACTICE AFTER FINAL REJECTION IN PATENT CASES

a. *Interviews*

Although one interview after final is normally available, the purpose of the interview must be clear and specific, and must be communicated to the examiner in advance. No extension of time is necessary to conduct an interview after the period for response expires, however, an extension is required for the purpose of filing a follow-up amendment or for the entry of an Examiner's Amendment requiring approval by the applicant.

b. *Amendment after Final Rejection*

A response to a final rejection will receive expedited handling and processing, and thus may avoid the necessity for filing an extension of time and/or an unnecessary notice of appeal, if the BOX AF Expedited Processing procedures is used by applicant.

In order to avoid some extension fees, responses to final rejections should be filed within two months of the date of the final rejection. If so filed, any Advisory Action mailed after the 3-month SSP expires will reset the SSP, for extension fee purposes, to expire on the date of the Advisory Action.

Although prosecution is restricted after a final action, applicant may anticipate entry of amendments which (1) cancel claims, (2) comply with formal requirements, (3) adopt an examiner's suggestions, (4) place the application in better form for appeal, or (5) place the application in condition for allowance. The examiner will usually refuse entry of an amendment which does not place the application in better form for appeal or in condition for allowance. If applicant believes that the examiner improperly denied entry of an amendment, applicant should promptly file a request for reconsideration and/or a petition under 37 CFR 1.181 for supervisory review, neither of which require an extension fee or petition fee.

c. *Continuing Application in Lieu of Response*

The filing of a continuing application within the period for response is acceptable in lieu of a response, Notice of Appeal or Brief in a finally rejected application. Applicant is cautioned, however, that this may not be done as compliance with a notice of incomplete response pursuant to 37 CFR 1.135(c). If time remains in the six-month maximum statutory period running from the date of the final rejection, applicant may acquire the necessary extensions of time in the finally rejected application to render the continuing application timely to avoid a hiatus in continuity.

Applicant should file a preliminary amendment in a continuation application filed after a final rejection in the parent application. If this is not done, a first action final rejection will be properly rendered in the continuation application. It is well to remember, also, that when an examiner has indicated that an amendment or certain portions of an amendment have not been entered for purposes of appeal, the amendment has not been entered. Therefore, the amendment should be presented in a preliminary amendment in the continuing application. In the case of a File Wrapper Continuation (37 CFR 1.62), applicant may merely request entry of the non-entered amendment.

A first action final rejection is proper in a continuation application, even if a preliminary amendment is filed, if all claims of the new application (1) are drawn to the same invention claimed in the parent applioation, and (2) would have been properly finally rejected on the qrounds or art of record in the next Office Action if they had been entered in the parent application. However, a first action final rejection is improper if the continuation application, or a preliminary amendment thereto, contains material which was presented after final rejection in the parent application, but was denied entry because it raised new issues requiring further consideration and/or search, or raised the issue of new matter. See MPEP 706.07(b). Accordingly, it is beneficial to first present an amendment under 37 CFR 1.116 in the parent application rather than first presenting it by way of preliminary amendment in a continuation application. It is beneficial because: (1) the examiner may determine that the amendment places the parent application in condition for allowance, which would avoid prolonging prosecution and would save the additional expense of filing a continuation application, and (2) it would obviate a first action final rejection in the event it is deemed necessary by applicant to file a continuation application.

19. REISSUES

a. *Amendments*

To avoid unnecessary delays in the issuance of reissue applications, applicants and their attorneys are reminded to exercise caution and give sufficient attention to 37 CFR 1.121(a) and (e) in presenting reissue amendments. The practices and procedures vary somewhat from regular utility application amendments.

MPEP Sec. 1455 provides guidance for proper entry of amendments and claim numbering. Publication of the reissue application(s) may be needlessly postponed while formal irregularities are corrected.

b. *Oaths and/or Declarations*

Since standard oath and declaration forms are not used in reissue applications, applicants are commonly neglecting to include averments required by 37 CFR 1.63 per 37 CFR 1.175(a). The most frequent omissions involve the "duty of disclosure" acknowledgment, and the "reviewed and understands" statement. Such omissions usually necessitate additional handling and correspondence, and cause undue time delays, which result in postponement of publication of the reissue patent.

A frequent problem in reissue practice is the failure of applicants to satisfactorily comply with 37 CFR 1.175 regarding the description of all errors of the original patent in the reissue oath or declaration. Applicants are required to specify errors in the original reissue oath or declaration at the time of filing the reissue application. They must also specify, in a supplemental oath or declaration, any errors brought to their attention during the prosecution, as well as the circumstances surrounding the occurrence or discovery of these errors. Every departure from the original patent represents an "error" and must be particularly and distinctly specified and supported in the original, or a supplemental, reissue oath or declaration under 37 CFR 1.175. See MPEP Sec. 1414 and 1444. Postponement of publication of the reissue patent may result if these requirements are not met at the time of allowance.

20. REEXAMINATION PROCEEDINGS

a. *Extensions of time*

Extensions of time under 37 CFR 1.136(a) and (b) are not permitted in reexamination proceedings. Extensions in reexamination proceedings are provided for in 37 CFR 1.550(c) and require no fee. However, the request must be filed prior to the expiration of the period set for response. A first request will be granted for sufficient cause and for a reasonable time specified - usually one month. Second or subsequent requests, or requests for more than one month, will be granted only in extraordinary situations.

b. *Time for Response after Final Action - Automatic Extension Policy*

In a reexamination proceeding only, filing of a timely first response to a final rejection is construed as including a request to extend the shortened statutory period for an additional month; which a one-month extension will be granted even if previous extensions have been granted under 37 CFR 1.550(c). However, in no case may the period for response exceed six months from the date of the final rejection.

c. *Amendment Format*

The format for amendments in reexamination proceedings is controlled solely by 37 CFR 1.121(f). In amending the description, the entire text of each paragraph to be amended must be presented. In amending the claims, the entire text of each claim to be amended must be presented. Each amendment must indicate ALL of the changes (insertions by underlining, and deletions by bracketing) in relation to the current text of the PATENT under reexamination, and NOT in relation to any prior amendment in the proceeding. New claims added during reexamination must be underlined in their entirety no matter how many times they are amended during the proceeding, and they should never contain brackets.

d. *Amendment after Close of Prosecution - Petition Required*

37 CFR 1.312, which provides for amendment of an *application* after allowance, does *not* apply in reexamination, because a request for reexamination is not an application. The reexamination rules do not provide for an amendment to be filed after prosecution has been closed. Consequently, any such proposed amendment must be accompanied by a separate petition under 37 CFR 1.182 in order to have the amendment considered.

21.SMALL ENTITY STATUS

a. *Small Entity Statements*

Verified statements claiming small entity status, where appropriate, would best be signed and submitted at the time the application oath or declaration is signed to permit filing of the statement with the application. This would reduce correspondence between attorney and client, reduce paper handling by the PTO support staff and the PTO Finance Branch, and greatly simplify the processing of subsequent papers involving fees. If small entity status is being claimed for the first time at the time of payment of the issue fee, a verified statement claiming small entity status should be submitted with the fee. See MPEP § 509.03.

VOL 1122 ISS 1 JA 1 1991 UMI

b. *Small Entity Statement in Continuing Application*

A new verified statement claiming small entity status must be filed in each application or patent in which it is desired to pay reduced fees, including continuing applications filed under 37 CFR 1.53, with the following exception: In continuing applications filed under 37 CFR 1.60 and 1.62, a reference to a verified statement in the parent application is adequate if the conditions for small entity are still satisfied.

22. TRADEMARKS

a. *Application Issues*

The Trademark Law Revision Act became effective on November 16, 1989. Various changes in filing date requirements have taken effect because of this legislation. While there has been an increase in the number of filings after this date, most applicants are in compliance with the changes. However, a breakdown of why applications have been returned for the months of July 1990 through September 1990 show some "problem areas" in compliance.

Application Drawings

As shown in the above chart, many applications are returned because of defective drawings.

One hundred and ninety one applications were held informal because the drawing heading was omitted. Applicants are reminded that, although the heading on the drawing does not have to be complete in order to get a filing date, the drawing must be in substantial compliance with Trademark Rule 2.52.

Applicants should be careful to identify their goods and/or services in the body of the application and in the appropriate part of the application form. The Office will not presume that goods identified in other parts of the application or on the drawing are the goods for which registration is sought.

A filing date will not be granted to an application using the class titles from International Classes or 42 as an identification of services.

Intent to Use Issues

The following are reminders about changes which have taken place due to intent-to-use:

(1) To receive a filing date, all applications based on Section 1(b) (intent-to-use) or Section 44 must contain a statement that the applicant has a bona fide intention to use the mark in commerce.

(2) An application cannot be based on both Section 1(a) (use in commerce) and Section 1(b) (intent to use). The applicant may assert Section 1(a) or Section 1(b) with a Section 44(d) or (e) dual basis if that intention is clearly stated in the application.

(3) The Office recommends that applicants wait until they have received a filing fee receipt before filing any papers related to a trademark application. The filing fee receipt includes the application serial number. The applicant should refer to that serial number in filing any paper to ensure the paper will be associated with the correct application file.

b. *Examination Issues*

(1) An application reciting concurrent use may not be filed based on a claim of bona fide intent to use the mark in commerce.

(2) An application may be divided into two or more applications upon submission by the applicant of a request to do so. A fee for dividing goods or services within a class (but not for separating classes) must be submitted. Any outstanding time period for action by the applicant in the original application at the time of the division will be applicable to each new separate application.

c. *Other Intent to Use Issues*

(1) Carefully review the Notice of Allowance, which is issued after an intent-to-use application is published in the *Trademark Official Gazette* and the opposition period is passed. Ensure all the information is correct and, if it is not, notify the Office immediately.

(2) When filing requests for extensions of time to file a statement of use the applicant must state the goods or services to which the mark pertains.

Applicant may incorporate by reference the goods and services set out in the Notice of Allowance. If applicant no longer intends to use the mark on certain goods listed in the application, applicant should state this clearly in its filing. In addition, the request for extension of time to file a statement of use must be signed by the applicant. The "color of authority" provision does not apply to requests for an extension of time. If applicant's request for an extension of time is denied and no time remains in the existing six month extension period to file another extension of time request, applicant's only recourse is to file a petition to the Commissioner in accordance with §§ 2.66 or 2.146.

d. *Post Registration*

All Section 8(a) affidavits or declarations must "state that the registered mark is in use in commerce and specify the nature of such commerce."

The affidavit or declaration must be filed between the fifth and sixth year following the date of registration and it must contain a statement that the mark is in use in commerce. There may be no extensions of time beyond the sixth year for submission of this statement. However, if the timely-filed affidavit or declaration does not set forth the type of commerce, the registrant will be given six months to submit that information. The rules do not provide for any extensions of time beyond the six months.

While the Post Registration Division will allow up to six months to respond to a letter from the Office, a supplemental affidavit or declaration required by Section 8(a) will not be considered unless it is received before the expiration of the six-year anniversary of the registration. It is suggested that applicants file Section 8(a) affidavits as early as possible between the fifth and sixth year following registration to allow time to submit an affidavit or declaration which is correct, if required.

All Section 8 affidavits filed on or after November 16, 1989, must identify the goods or services recited in the registration on or in connection with which the mark is in use in commerce. These goods or services may be incorporated by reference, if the incorporation by reference is specifically stated in the affidavit.

All Section 8 affidavits are now required to be accompanied by a specimen showing current use of the mark unless a showing of excusable nonuse is made.

It will speed up processing of Section 8 affidavits and renewal applications if the affiant/declarant will furnish a copy of any relevant assignment, date stamped by the USPTO with the reel and frame number. These can be accepted by the Post-Registration Branch as valid evidence of an assignment.

Trademark registrations issued on or after November 16, 1989, will remain in force for ten (10) years provided a Section 8 affidavit is filed and accepted by the PTO between the fifth and sixth year, and the registration is not otherwise cancelled or abandoned.

Registrations which have expired on or after November 16, 1989, will be renewed for 10 years. Only registrations which would have expired before November 16, 1989, and were renewed before November 16, 1989, were renewed for a 20-year term.

e. *Trademark Trial and Appeal Board*

SPECIAL BOXES FOR MAIL

Special PTO mail box numbers should be used to allow forwarding of particular types of mail to the appropriate areas as quickly as possible. Such mail is forwarded directly to the appropriate area without being opened. Only the specified type of document should be placed in an envelope addressed to one of these boxes. If any documents other than the specified type identified for each box are addressed to that box, they will be delayed in reaching the appropriate area for which they are intended.

The following special boxes should be used only for their specified purpose. Address mail as follows:

Box _____
Commissioner of Patents and Trademarks
Washington, D.C. 20231

Box 3	Mail for the Office of Personnel from NFC.
Box 4	Mail for the Assistant Commissioner for External Affairs and the Office of Legislation and International Affairs.
Box 5	"No fee" mail related to trademarks.
Box 6	Mail for the Office of Procurement.
Box 7	Reissue applications for patents involved in litigation and subsequently filed related papers.
Box 8	All papers for the Office of the Solicitor except communications relating to pending litigation.
Box 9	Coupon orders for U.S. patent and trademark copies.
Box 10	Orders for certified copies of patent and trademark applications.
Box 11	Electronic Ordering Service (EOS).
Box 12	Contributions to the Examiner Education Program.
Box 13	Mail for the Employee and Labor Relations Division.
Box 200	Mail relating to PTO Bicentennial Celebration.
Box AF	Expedited procedure for processing amendments and other responses after final rejection.
Box DAC	Petitions to revive, petitions to accept late payment of fees, petitions to defer issue, and petitions to withdraw an application from issue.
Box FWC	Requests for File Wrapper Continuation Applications.
Box Interference	Communications relating to interferences and applications and patents involved in interference.
Box Issue Fee	All communications following the receipt of a PTOL-85, "Notice of Allowance and Issue Fee Due," and prior to the issuance of a patent should be addressed to Box Issue Fee, unless advised to the contrary. Assignments are the exception. Assignments should be submitted in a separate envelope and not be sent to Box Issue.
Box ITU	All Intent to Use documents excluding the initial application and amendments to allege use.
Box M. Fee	Correspondence related to a patent that is subject to the payment of a maintenance fee.
Box Non Fee Amendment	Non-fee amendments to patent applications. (Use Box AF for responses after final rejection.)
Box OED	Mail for the Office of Enrollment and Discipline.
Box Pat. Ext.	Applications for patent term extension.
Box PCT	Mail related to applications filed under the Patent Cooperation Treaty.
Box Reexam	Mail related to Reexamination.
Box SN	For fee and petitions under 37 CFR 1.182 to obtain date received and/or serial number for patent application *prior* to the Office's standard notification (return post card or the official "Filing Receipt," "Notice to File Missing Parts," or "Notice of Incomplete Application").
PATENT APPLICATION	New patent application and associated papers and fees.
TRADEMARK APPLICATION	New trademark application and associated papers and fees.
Box Assignments	All assignment documents except those filed in new patent applications.
Box SEQUENCE	All application papers, computer readable forms and fees related to applications containing nucleotide sequence and/or amino acid sequence disclosures in accordance with 37 CFR §§ 1.821 through 1.825.

Reference Collection of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to libary, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effctive access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

MARKS PUBLISHED FOR OPPOSITION

The following marks are published in compliance with section 12(a) of the Trademark Act of 1946. Applications for the registration of marks in more than one class have been filed as provided in section 30 of said act as amended by Public Law 772, 87th Congress, approved Oct. 9, 1962, 76 Stat. 769. Opposition under section 13 may be filed within thirty days of the date of this publication. See rules 2.101 to 2.105.

A separate fee of two hundred dollars for opposing each mark in each class must accompany the opposition.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

TRADEMARK REGISTRATIONS AMENDED, CORRECTED, ETC.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

Any change to the registration will be indicated at the bottom of each entry under ELEMENTS AMENDED, CORRECTED OR RESTRICTED. With the exception of changes to the goods and services, additions to the registration will appear in asterisks and deletions of the registration will appear in brackets. Elements which are only changed will be listed with no punctuation. As to the goods/services statement, amendments to the goods/services will appear in asterisks and deletions will appear in brackets. In addition if any change to the goods/services occurs, the element "Goods/Services" will be listed under ELEMENTS AMENDED, CORRECTED OR RESTRICTED.

HARRY F. MANBECK, Jr.
Assistant Secretary and Commissioner of Patents and Trademarks.

Notice of Maintenance Fees Payable

Title 37, Code of Federal Regulations, Section 1.362(d), effective Nov. 1, 1984, provides that maintenance fees may be paid without surcharge for a six-month period beginning 3, 7, and 11 years after the date of issue of patents based on application filed on or after Dec. 12, 1980. An additional six-month grace period is provided by 35 U.S.C. 41(b) and 37 CFR 1.362(e) for payment of the maintenance fee with the surcharge set forth in 37 CFR 1.20(k) or (l), as amended effective Apr. 17, 1989. If the maintenance fee is not paid in a patent requiring such payment the patent will expire on the 4th, 8th or 12th anniversary of the patent.

Attention is drawn to the patents which were issued on January 1, 1988 for which maintenance fees due at 3 years and six months may now be paid. The patents have patent numbers within the following ranges:

Utility Patents 4,716,594 through 4,718,121
Reissue Patents based on the above identified patents.

Attention is drawn to the patents which were issued on January 3, 1984 for which maintenance fees due at 7 years and six months may now be paid. The patents have patent numbers within the following ranges:

Utility Patents 4,423,523 through 4,424,594
Reissue Patents based on the above identified patents.

No maintenance fees are required for design or plant patents.

Payments of maintenance fees in patents should be directed to "Commissioner of Patents and Trademarks, Box M. Fee, Washington, D.C. 20231."

The current amounts of the maintenance fees due at 3 years and six months and seven years and six months are set forth in 37 CFR 1.20(e), and (f), as amended Nov. 5, 1990, which are reproduced below:

37 CFR § 1.20 Post-issuance fees and surcharges

Notice of Expiration of Patents Due to Failure to Pay Maintenance Fees

35 U.S.C. 41 and 37 CFR 1.362(g) provide that if the required maintenance fee and any applicable surcharge are not paid in a patent requiring such payment, the patent will expire at the end of the 4th, 8th, or 12th anniversary of the grant of the patent depending on the first maintenance fee which was not paid.

According to the records of the Office, the patents listed below have expired due to failure to pay the required maintenance fee and any applicable surcharge.

Patent Terms Extended Under 35 USC 156

Certificates extending the terms of the following patents were issued on December 7, 1990.

U.S. Patent No. 3,842,061, granted Oct. 15, 1974, to Lars-Olof Andersson et al, Owner of Record: *KabiVitrum AB*, Title: METHOD FOR ISOLATION OF ANTITHROMBIN FROM ANIMAL TISSUE MATERIALS BY ADSORPTION ON SULFATED CARBOHYDRATE GEL, Classification: 530/393, Product Trade Name: ATnativ, Term Extended: 5 years.

U.S. Patent No. 3,911,138, Granted Oct. 7, 1975, to Leland C. Clark, Jr., Owner of Record: *Children's Hospital Medical Center of Cincinnati, Ohio*, Title: ARTIFICIAL BLOOD AND METHOD FOR SUPPORTING OXYGEN TRANSPORT IN ANIMALS, Classification: 514/746, Product Trade Name: Fluosol, Term Extended: 2 years.

U.S. Patent No. 4,001,331, Granted Jan. 4, 1977, to Meier E. Freed, et al, Owner of Record: *American Home Products Corp.*, Title: BENZOBICYCLOALKANE, Classification: 564/427, Product Trade Name: Dalgan, Term Extended: 2 years.

U.S. Patent No. 4,089,969, Granted May 16, 1978, to Joseph M. Muchowski et al., Owner of Record: *Syntex (U.S.A.) Inc.*, Title: 5-AROYL-1, 2-DIHYDRO-3H-PYRROLO[1,2-a]PYRROLE-1-CARBOXYLIC ACID DERIVATIVES AND PROCESS FOR THE PRODUCTION THEREOF, Classification: 514/416, Product Trade Name: Toradol, Term Extended: 2 years.

U.S. Patent No. 4,100,274, Granted July 11, 1978, to Anand Swaroop Dutta et al, Owner of Record: *Imperial Chemical Industries PLC*, Title: POLYPEPTIDE, Classification: 514/15, Product Trade Name: Zoladex, Term Extended: 2 years.

U.S. Patent No. 4,105,783, Granted Aug. 8, 1978, to Ruey J. Yu et al, Owner of Record: *Westwood Pharmaceuticals Inc.*, Title: THERAPEUTIC TREATMENT OF DRY SKIN, Classification: 514/549, Product Trade Name: Lac-Hydrin, Term Extended: 541 days.

U.S. Patent No. 4,239,747, Granted Dec. 16, 1980, to Heinrich Pfeiffer et al, Owner of Record: *Schering Aktiengesellschaft*, Title: DICARBOXYLIC ACID BIS (3,5-DICARBAMOYL-2,4,6-TRIIODOANILIDES) USEFUL AS X-RAY CONTRAST AGENTS, Classification: 424/5, Product Trade Name: Osmovist, Term Extended: 2 years.

U.S. Patent No. 4,297,488, Granted Oct. 27, 1981, to Burton G. Christensen et al., Owner of Record: *Merck & Co., Inc.*, Title: 7-ALPHA-METHOXY CEPHALOSPORINS, Classification: 540/221, Product Trade Name: Zefazone, Term Extended: 2 years.

U.S. Patent No. 4,400,358, Granted Aug. 23, 1983, to Rudi D. Neirinckx, Owner of Record: *E.R. Squibb & Sons, Inc.*, Title: METHOD AND ADSORBANT COMPOSITION FOR ^{82}RB GENERATION, Classification: 423/2, Product Trade Name: Cardiogen-82, Term Extended: 2 years.

U.S. Patent No. 4,443,466, Granted Apr. 17, 1984, to Arto J. Karjalainen et al, Owner of Record: *Farmos-Yhtyma Oy (Farmos Group Ltd.)*, Title: 4-BENZYL-AND 4 BENZOYL-SUBSTITUTED IMIDAZOLE DERIVATIVES AND USE AS MEDICAMENTS, Classification: 514/396, Product Trade Name: Dormosedan, Term Extended: 954 days.

U.S. Patent No. 4,452,745, Granted June 5, 1984, to William B. Lacefield et al, Owner of Record: *Eli Lilly and Company*, Title: 9-AMINOALKYLFLOURENES, Classification: 558/427, Product Trade Name: Decabid, Term Extended: 2 years.

SPECIAL BOXES FOR MAIL

Special PTO mail box numbers should be used to allow forwarding of particular types of mail to the appropriate areas as quickly as possible. Such mail is forwarded directly to the appropriate area without being opened. Only the specified type of document should be placed in an envelope addressed to one of these boxes. If any documents other than the specified type identified for each box are addressed to that box, they will be delayed in reaching the appropriate area for which they are intended.

The following special boxes should be used only for their specified purpose. Address mail as follows:

Box _____
Commissioner of Patents and Trademarks
Washington, D.C. 20231

Box 3	Mail for the Office of Personnel from NFC.
Box 4	Mail for the Assistant Commissioner for External Affairs and the Office of Legislation and International Affairs.
Box 5	"No fee" mail related to trademarks.
Box 6	Mail for the Office of Procurement.
Box 7	Reissue applications for patents involved in litigation and subsequently filed related papers.
Box 8	All papers for the Office of the Solicitor except communications relating to pending litigation.
Box 9	Coupon orders for U.S. patent and trademark copies.
Box 10	Orders for certified copies of patent and trademark applications.
Box 11	Electronic Ordering Service (EOS).
Box 12	Contributions to the Examiner Education Program.
Box 13	Mail for the Employee and Labor Relations Division.
Box 200	Mail relating to PTO Bicentennial Celebration.
Box AF	Expedited procedure for processing amendments and other responses after final rejection.
Box DAC	Petitions to revive, petitions to accept late payment of fees, petitions to defer issue, and petitions to withdraw an application from issue.
Box FWC	Requests for File Wrapper Continuation Applications.
Box Interference	Communications relating to interferences and applications and patents involved in interference.
Box Issue Fee	All communications following the receipt of a PTOL-85, "Notice of Allowance and Issue Fee Due," and prior to the issuance of a patent should be addressed to Box Issue Fee, unless advised to the contrary. Assignments are the exception. Assignments should be submitted in a separate envelope and not be sent to Box Issue.
Box ITU	All Intent to Use documents excluding the initial application and amendments to allege use.
Box M. Fee	Correspondence related to a patent that is subject to the payment of a maintenance fee.
Box Non Fee Amendment	Non-fee amendments to patent applications. (Use Box AF for responses after final rejection.)
Box OED	Mail for the Office of Enrollment and Discipline.
Box Pat. Ext.	Applications for patent term extension.
Box PCT	Mail related to applications filed under the Patent Cooperation Treaty.
Box Reexam	Mail related to Reexamination.
Box SN	For fee and petitions under 37 CFR 1.182 to obtain date received and/or serial number for patent application *prior* to the Office's standard notification (return post card or the official "Filing Receipt," "Notice to File Missing Parts," or "Notice of Incomplete Application").
PATENT APPLICATION	New patent application and associated papers and fees.
TRADEMARK APPLICATION	New trademark application and associated papers and fees.
Box Assignments	All assignment documents except those filed in new patent applications.
Box SEQUENCE	All application papers, computer readable forms and fees related to applications containing nucleotide sequence and/or amino acid sequence disclosures in accordance with 37 CFR §§ 1.821 through 1.825.

Reference Collection of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to libary, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effctive access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

Plant Patents ..... none

MARKS PUBLISHED FOR OPPOSITION

The following marks are published in compliance with section 12(a) of the Trademark Act of 1946. Applications for the registration of marks in more than one class have been filed as provided in section 30 of said act as amended by Public Law 772, 87th Congress, approved Oct. 9, 1962, 76 Stat. 769. Opposition under section 13 may be filed within thirty days of the date of this publication. See rules 2.101 to 2.105.

A separate fee of two hundred dollars for opposing each mark in each class must accompany the opposition.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

TRADEMARK REGISTRATIONS ISSUED UNDER SECTION 1(d)

The following marks have registered on the Principal Register pursuant to the intent-to-use provisions of Section 1(d) of the Trademark Act of 1946, as amended.

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

TRADEMARK REGISTRATIONS AMENDED, CORRECTED, ETC.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

Any change to the registration will be indicated at the bottom of each entry under ELEMENTS AMENDED, CORRECTED OR RESTRICTED. With the exception of changes to the goods and services, additions to the registration will appear in asterisks and deletions of the registration will appear in brackets. Elements which are only changed will be listed with no punctuation. As to the goods/services statement, amendments to the goods/services will appear in asterisks and deletions will appear in brackets. In addition if any change to the goods/services occurs, the element "Goods/Services" will be listed under ELEMENTS AMENDED, CORRECTED OR RESTRICTED.

Assistant Secretary and Commissioner of Patents and Trademarks.

Notice of Maintenance Fees Payable

Title 37, Code of Federal Regulations, Section 1.362(d), effective Nov. 1, 1984, provides that maintenance fees may be paid without surcharge for a six-month period beginning 3, 7, and 11 years after the date of issue of patents based on application filed on or after Dec. 12, 1980. An additional six-month grace period is provided by 35 U.S.C. 41(b) and 37 CFR 1.362(e) for payment of the maintenance fee with the surcharge set forth in 37 CFR 1.20(k) or (l), as amended effective Apr. 17, 1989. If the maintenance fee is not paid in a patent requiring such payment the patent will expire on the 4th, 8th or 12th anniversary of the patent.

Attention is drawn to the patents which were issued on January 12, 1988 for which maintenance fees due at 3 years and six months may now be paid. The patents have patent numbers within the following ranges:

Utility Patents 4,718,122 through 4,719,649
Reissue Patents based on the above identified patents.

Attention is drawn to the patents which were issued on January 10, 1984 for which maintenance fees due at 7 years and six months may now be paid. The patents have patent numbers within the following ranges:

Utility Patents 4,424,595 through 4,425,666
Reissue Patents based on the above identified patents.

No maintenance fees are required for design or plant patents.

Payments of maintenance fees in patents should be directed to "Commissioner of Patents and Trademarks, Box M. Fee, Washington, D.C. 20231."

The current amounts of the maintenance fees due at 3 years and six months and seven years and six months are set forth in 37 CFR 1.20(e), and (f), as amended Nov. 5, 1990, which are reproduced below:

37 CFR § 1.20 Post-issuance fees and surcharges

"(e) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after after Dec. 12, 1980 and before Aug. 27, 1982, in force beyond 4 years; the fee is due by three years and six months after the original grant.....$245.00

"(f) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after Dec. 12, 1980 and before Aug. 27, 1982, in force beyond 8 years; the fee is due by seven years and six months after the original grant.....$495.00"

"(h) For maintaining an original or reissue patent except a design or plant patent, based on an application filed on or after Aug. 27,1982, in force beyond 4 years; the fee is due by three years and six months after the original grant:

By a small entity ($1.9(f)).....$415.00
By other than a small entity.....$850.00"

"(i) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after Aug. 27, 1982, in force beyond 8 years; the fee is due by seven years and six months after the original grant:

By a small entity ($1.9(f)).....$835.00
By other than a small enttity.....$1670.00"

The amounts of the surcharges for paying the maintenance fee during the grace period or after the expiration of the patent are set forth in 37 CFR 1.20(k), (l) and (m), which are reproduced below:

"(k) Surcharge for paying a maintenance fee during the 6-month grace period following the expiration of three years and six months , seven years and six months, and eleven years and six months after the date of the original grant of a patent based on an application filed on or after Dec. 12, 1980 and before Aug. 27,1982.....$120.00"

"(l) Surcharge for paying a maintenance fee during the 6-month grace period following the expiration of three years and six months, seven years and six months, and eleven years and six months after the date of the original grant of a patent based on an application filed on or after Aug. 27, 1982:

By a small entity($1.9(f)).....$60.00
By other than a small entity.....$120.00"

"(m) Surcharge for accepting a maintenance fee after expiration of a patent for non-timely payment of a maintenance fee where the delay is shown to the satisfaction of the Commissioner to have been unavoidable.....$550.00"

Notice of Expiration of Patents Due to Failure to Pay Maintenance Fees

35 U.S.C. 41 and 37 CFR 1.362(g) provide that if the required maintenance fee and any applicable surcharge are not paid in a patent requiring such payment, the patent will expire at the end of the 4th, 8th, or 12th anniversary of the grant of the patent depending on the first maintenance fee which was not paid.

According to the records of the Office, the patents listed below have expired due to failure to pay the required maintenance fee and any applicable surcharge.

Availability of PatentIn Computer Program Training Tuesday, January 22, 1991 and Wednesday, January 23, 1991

The Patent and Trademark Office (PTO) has developed a computer program, called PatentIn, that will facilitate compliance with the Requirements for Patent Applications Containing Nucleotide Sequence and/or Amino Acid Sequence Disclosures

(sequence rules: 37 CFR 1.821 through 1.825). (Final rules were published in the *Federal Register*, 55 Fed. Reg. 18230 (May 1, 1990), and in the *Official Gazette*, 1114 O.G. 29 (May 15, 1990).)

Two one day training sessions will be held on the use of the PatentIn Computer Program on Tuesday, January 22, 1991 and Wednesday, January 23, 1991 from 10:00 am to 4:00 pm. The training will be held at the Department of Agriculture Graduate School Training Facility. The School is located at 600 Maryland Ave., S.W. Washington, D.C. at the L'Enfant Plaza Metro stop.

The training will be hands on, using personal computer equipment and will include (1) the use of PatentIn to prepare the sequence listing file of information, and (2) the use of word processing software to prepare the PatentIn sequence listing file for inclusion as part of the application papers. The class will also include training on the basic file editing and manipulation skills that may be necessary for preparing sequence information for importing into PatentIn.

Because of the limited number of computers available, each class will be limited to no more than 18 participants.

Requests to attend the class should be made in writing, addressed to the Commissioner of Patents and Trademarks, Washington, D.C., Attention: Lois E. Boland; Special Program Examiner, Office of the Assistant Commissioner for Patents-Crystal Park 2, Suite 919. Requests should include a check for $100 or the requisite authorization to charge a PTO Deposit Account. Requests authorizing charges to PTO Deposit Accounts may also be sent via facsimile to 703-557-8331. Any questions about the sequence rules or this notice should be directed to Lois E. Boland, by telephone at (703) 557-8384.

Availability of PatentIn Computer Program and Policy Regarding Enforcement of the Requirements for Patent Applications Containing Nucleotide Sequence and/or Amino Acid Sequence Disclosure

The Patent and Trademark Office (PTO) has developed a computer program, called PatentIn, that will facilitate compliance with the Requirements for Patent Applications Containing Nucleotide Sequence and/or Amino Acid Sequence Disclosures (sequence rules: 37 CFR §§ 1.821 through 1.825). (Final rules were published in the *Federal Register*, 55 Fed. Reg. 18230 (May 1, 1990), and in the *Official Gazette*, 1114 O.G. 29 (May 15, 1990).)

The PatentIn program is now available. The program is only available for IBM PC XT, AT, PS/2 and compatible systems, having hard disk drives. Installation of PatentIn on a hard disk requires a minimun of 1.2 megabytes free disk space. The program further requires a PC with 550 kilobytes free in RAM (random access memory). The program is available on 3 1/2" or 5 1/4" diskettes. While the PatentIn program is not intended to be the sole means for complying with the sequence rules, it should be noted that it was designed to facilitate compliance with all of the mandatory and optional requirements of the rules.

The PTO did not receive the final version of the PatentIn program until after the effective date of the sequence rules. In view of this delay, the PTO has delayed sending notices to comply with the sequence rules in those applications filed that have not attempted to comply with the rules. Although the effective date of the sequence rules remains October 1, 1990, and all applications filed on or thereafter must eventually comply with the rules, a grace period with respect to enforcement of the rules for most applications will be in effect until February 15, 1991. At that time, notices to comply will be mailed in all applications, containing nucleotide sequence and/or amino acid sequence disclosures filed on or after October 1, 1990, that have not complied or do not comply with the rules.

Requests for copies of the PatentIn program and associated materials should be made in writing, addressed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231, Attention: Lois E. Boland; Special Program Examiner, Office of the Assistant Commissioner for Patents-Crystal Park 2, Suite 919. Requests should include a check for $480.00 or the requisite authorization to charge a PTO Deposit Account. If applicable, requests should also specify diskette size. Any questions about the sequence rules or this notice should be directed to Lois E. Boland, by telephone, at (703) 557-8384.

Adverse Decisions in Interference

In the designated interferences involving the following patents, final decisions have been rendered that the respective patentees are not entitled to patents containing the claims listed.

Patent No. 4,506,016, Bertram Flehmig, HEPATITIS-A VIRUSES ADAPTED TO HUMAN FIBROBLAST CELLS, Interference No. 101,584, decided July 17, 1989, claims 1-4 and 7-9.

Patent No. 4,543,643, Kenji Shibazaki, Yutaka Irie, Masazumi Ito, Tomoji Murata, COPYING MAGNIFICATION SETTING DEVICE FOR AN ELECTROPHOTOGRAPHIC COPYING APPARATUS, Interference No. 101,882, decided Aug. 20, 1990, claims 1-11 and 13-27.

Patent No. 4,648,455, Mike A. Luke, METHOD AND APPARATUS FOR STEAM INJECTION IN SUBTERRANEAN WELLS, Interference No. 102,042, decided Oct. 9, 1990, claims 1-3, 5-6, 7/1, 7/6, 9, 10, 11, 12/10, 12/11, 14, 15/10, 15/11, 15/14, 16/10, 16/11, 16/14, 20-22, 23/20, 23/21, 23/22, 24/20, 24/21 and 24/22.

Patent No. 4,675,321, John J. Baldwin, Steven M. Pitzenberger, David E. McClure, SUBSTITUTED PYRIMIDINES USEFUL AS CALCIUM CHANNEL BLOCKERS, Interference No. 102,354, decided Oct. 31, 1990, claims 1-9.

Patent No. 4,680,618, Toshio Kuroda, Koichi Kumazawa, PACKAGE COMPRISING A COMPOSITE METAL BODY BROUGHT INTO CONTACT WITH A CERAMIC MEMBER, Interference No. 102,422, decided Oct. 19, 1990, claims 1 and 2.

Patent No. 4,693,563, Takamasa Harada, Masaaki Taguchi, FERROELECTRIC LIQUID CRYSTAL ELECTRO-OPTICAL DEVICE, Interference No. 102,091, decided Nov. 16, 1990, claims 1-20.

Patent No. 4,712,908, Tomobumi Nakayama, Toshihiko Mori, Masayuki Hirose, Toru Ohbuchi, Masanori Miyata, Shinichi Nakamura, Takeshi Honjo, IMAGE FORMING APPARATUS, Interference No. 102,411, decided Nov. 9, 1990, claims 5-7.

Patent No. 4,724,448 Keisuke Maeda, Yoshinobu Kudo, FIXED-FOCUS AMPHIBIOUS CAMERA, Interference No. 102,394, decided Sept. 25, 1990, claims 1 and 2.

Patent No. 4,725,129, Katsumi Kondo, Yoshiharu Nagae, METHOD OF DRIVING A FERROELECTRIC LIQUID CRYSTAL ELEMENT, Interference No. 102,092, decided Nov. 16, 1990, claims 1-10.

Patent No. 4,739,840, Bobby E. Cox, METHOD AND APPARATUS FOR PROTECTING A SHALLOW WATER WELL, Interference No. 102,322, decided Nov. 6, 1990, claims 1-4, 8, 13, 15, 17 and 18.

Patent No. 4,749,717, Lawrence I. Kruse, DOPAMINE-BETA-HYDROXYLASE INHIBITORS, Interference No. 102,379, decided Nov. 20, 1990, claims 1-6.

Patent No. 4,758,422, Steven C. Quay, FERRIOXAMINE PARAMAGNETIC CONTRAST AGENTS FOR MR IMAGING, Interference No. 102,373, decided Oct. 3, 1990, claims 1-5, 7, 9 and 10.

Patent No. 4,806,961, Masatoshi Kamitani, Manabu Inoue, Motohiro Nakanishi, Hiroshi Ootsuka, Yoshinobu Kudo, Yoshiaki Hata, PHOTOGRAPHIC CAMERA, Interference No. 102,424, decided Nov. 15, 1990, claims 1-14.

Patent No. 4,831,184, Raymond D. Youssefyeh, Jerry W. Skiles, John T. Suh, Howard Jones, N-SUBSTITUTED-AMIDO-AMINO ACIDS, Interference No. 101,374, decided Nov. 6, 1990 claims 1-9, 11, 14 and 16.

SPECIAL BOXES FOR MAIL

Special PTO mail box numbers should be used to allow forwarding of particular types of mail to the appropriate areas as quickly as possible. Such mail is forwarded directly to the appropriate area without being opened. Only the specified type of document should be placed in an envelope addressed to one of these boxes. If any documents other than the specified type identified for each box are addressed to that box, they will be delayed in reaching the appropriate area for which they are intended.

The following special boxes should be used only for their specified purpose. Address mail as follows:

Box _____
Commissioner of Patents and Trademarks
Washington, D.C. 20231

Box 3	Mail for the Office of Personnel from NFC.
Box 4	Mail for the Assistant Commissioner for External Affairs and the Office of Legislation and International Affairs.
Box 5	"No fee" mail related to trademarks.
Box 6	Mail for the Office of Procurement.
Box 7	Reissue applications for patents involved in litigation and subsequently filed related papers.
Box 8	All papers for the Office of the Solicitor except communications relating to pending litigation.
Box 9	Coupon orders for U.S. patent and trademark copies.
Box 10	Orders for certified copies of patent and trademark applications.
Box 11	Electronic Ordering Service (EOS).
Box 12	Contributions to the Examiner Education Program.
Box 13	Mail for the Employee and Labor Relations Division.
Box 200	Mail relating to PTO Bicentennial Celebration.
Box AF	Expedited procedure for processing amendments and other responses after final rejection.
Box DAC	Petitions to revive, petitions to accept late payment of fees, petitions to defer issue, and petitions to withdraw an application from issue.
Box FWC	Requests for File Wrapper Continuation Applications.
Box Interference	Communications relating to interferences and applications and patents involved in interference.
Box Issue Fee	All communications following the receipt of a PTOL-85, "Notice of Allowance and Issue Fee Due," and prior to the issuance of a patent should be addressed to Box Issue Fee, unless advised to the contrary. Assignments are the exception. Assignments should be submitted in a separate envelope and not be sent to Box Issue.
Box ITU	All Intent to Use documents excluding the initial application and amendments to allege use.
Box M. Fee	Correspondence related to a patent that is subject to the payment of a maintenance fee.
Box Non Fee Amendment	Non-fee amendments to patent applications. (Use Box AF for responses after final rejection.)
Box OED	Mail for the Office of Enrollment and Discipline.
Box Pat. Ext.	Applications for patent term extension.
Box PCT	Mail related to applications filed under the Patent Cooperation Treaty.
Box Reexam	Mail related to Reexamination.
Box SN	For fee and petitions under 37 CFR 1.182 to obtain date received and/or serial number for patent application *prior* to the Office's standard notification (return post card or the official "Filing Receipt," "Notice to File Missing Parts," or "Notice of Incomplete Application").
PATENT APPLICATION	New patent application and associated papers and fees.
TRADEMARK APPLICATION	New trademark application and associated papers and fees.
Box Assignments	All assignment documents except those filed in new patent applications.
Box SEQUENCE	All application papers, computer readable forms and fees related to applications containing nucleotide sequence and/or amino acid sequence disclosures in accordance with 37 CFR §§ 1.821 through 1.825.

Reference Collection of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to libary, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effctive access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

MARKS PUBLISHED FOR OPPOSITION

The following marks are published in compliance with section 12(a) of the Trademark Act of 1946. Applications for the registration of marks in more than one class have been filed as provided in section 30 of said act as amended by Public Law 772, 87th Congress, approved Oct. 9, 1962, 76 Stat. 769. Opposition under section 13 may be filed within thirty days of the date of this publication. See rules 2.101 to 2.105.

A separate fee of two hundred dollars for opposing each mark in each class must accompany the opposition.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
